SAMANVAY -The Economics and Research Society of IGDTUW

The human race's curiosity has expressed itself in the creation of various fields of study that examine specific aspects of the world around us. The 'natural' sciences like physics and chemistry study the behavior of the basic particles and elements of the universe and their interactions with each other. The 'humanities', on the other hand, study the creations of humans, such as literary texts and the arts.

Interspersed between these two is

the Economics—a 'social science' which deploys a highly quantitative, data-driven, problem-solving approach towards understanding the behaviour of the human beings. Economics, therefore, is the field of study that is best placed to track, study, project and predict human behavior; and as such is one of the most important and relevant skills for the world today, helping us choose wisely when it comes to one's personal, social and professional lives.

Keeping above aspects in mind, Samanvay-The Economics and Research Society was introduced on 29 November 2019. Samanvay aims to foster and propagate an environment in which students can enhance their quality knowledge in the domain of economics and research that will equip them with practical and theoretical insights of the subject.
