

Brainstorming sessions (6th November 2023)

The session was conducted by Ecell society of IGDTUW with the aim of fostering an environment that encourages members to openly share their startup concepts and assess their viability for business initiation. It provided a platform for a constructive dialogue, enabling a deeper understanding of potential customers and the challenges they might encounter. The primary objective was to exchange startup ideas and deliberate on their practicability. Various concepts, including a Document Management App, Health App, and Study in Real App/Website, were thoroughly examined, laying the foundation for potential ventures.
