

Scheme and Course Structure of Two-Year Full-Time Post Graduate MBA Program (Applicable for batches admitted from Academic Session 2021 onwards)

Course Structure:

Structure of MBA Program

The MBA courses are divided into following distinct areas, namely:

- **Departmental Core Courses (DCC)**
- **Allied Management Course (AMC)**
- **Departmental Elective Courses (DEC)**
- **Generic Open Elective Courses (GEC)**

A) Nomenclature

Departmental Core Courses (DCC): These are department specific compulsory courses to be studied by the student as a core requirement for the MBA degree. These courses also include “Summer Project/Internship Report and Viva Voice” and “Major Project Report and Viva Voice”.

- **Summer Project/Internship Report and Viva Voice:** At the end of the Second Semester every student shall undergo Summer Training for Eight Weeks in the industry/Research or Academic Institute. After completion of training, they would be required to submit the training report as per the dates decided by the university and they shall also appear for the viva voice. This component will be evaluated during the third semester for 4 credits.
- **Major Project Report and Viva Voice:** In the Fourth semester all the students shall do the project/dissertation of 6 credits. This management project would give them an exposure to the actual business environment, to apply their management knowledge and skills in managing the business. This will prepare them for working in industry and business organizations. At the end of fourth semester as per the dates decided by the university, students would be required to submit their management project report and would also present themselves for viva voice.

Allied Management Course (AMC)

These courses are allied but compulsory courses. The purpose of these courses is to develop various skills required in management and business environments such as computer applications, mathematical, statistical, ICT knowledge, technical report writing, and business communication skills.

However, if a “Humanities, Social Sciences, Management and Skill Development Course” is picked from the existing B. Tech scheme then the course would be identified by **HMC** code from B. Tech scheme.

Departmental Elective Courses (DEC)

These courses are specific or advanced or supportive to the discipline/subject/specialization of study or which provides an extended scope. The Management Department would offer a wide range of elective courses pertaining to the concerned MBA degree.

Generic Open Elective Courses (GEC):

GEC are value-based courses that are aimed at man-making education. GEC courses can be completed in-house (GEC courses offered by IGDTUW various departments or ANVESHAN Foundation) or from any other university in online/offline mode or through MOOC (NPTEL, SWAYAM). Separate guidelines may be prepared for transferring the credits from these MOOC courses. With a rider that these courses will not be similar to the courses done under other categories viz, DCC, AMC, DEC and HMC.

- Variety of these courses may include Creative Art Courses like Dance, Yoga, Music etc.; Social Welfare Courses like NCC, NSS, Unnat Bharat, Swachh Bharat, Fire Fighting etc.; and Women Empowerment Courses like Women Safety, Self Defence, Gender Sensitization etc. However, workshops or sessions on yoga, meditation, ethics etc. can be held from the beginning of the first year for the well-being of the students and students shall not be evaluated for these sessions.
 - Students may also opt for subjects from the Entrepreneurship category where she can enhance/groom her skills to pursue her career as a successful entrepreneur. She will be evaluated based on her business plan, innovation involved in the idea, development and execution for the same. A Student must be able to prove her sincere efforts in implementing her business idea and bringing it to the next level.
 - If a student is interested in pursuing a research career, she may opt for writing research paper and based on the quality of research paper published, she may be suitably awarded the marks/grade. Separate guidelines may be prepared for evaluation of the quality of research paper.
 - Students, who are more inclined towards project development, may work on a live and sufficiently large project under the guidance of a faculty member or industry person. These students may be evaluated based on their performance in the project development. End result should ensure a good quality product development which may be deployed in a real environment.
- B)** If the student opts for a GEC course outside IGDTUW in offline/online mode, all the expenses including registration and certification fee shall be borne by the student. The duration of the GEC course shall be minimum 6 weeks.

C) Credits of Different Curricular Components in MBA

Curricular Components	Credits*	Weightage (Approximately)
Departmental Core Courses (DCC) Including, <ul style="list-style-type: none"> ● Summer Project Report and Viva Voice ● Major Project Report and Viva Voice 	62 04 06	58
Allied Management Course (AMC/HMC)	14	11
Departmental Elective Courses (DEC)	32	26
Generic Open Elective Courses (GEC)	06	05
Grand Total	124	100%

Curricular Components		Credit*
a	Departmental Subjects, <ul style="list-style-type: none"> ● Departmental Core Courses (DCC) Including <ul style="list-style-type: none"> ● Summer Project Report and Viva Voice (DCC) ● Project Report and Viva Voice (DCC) ● Department Elective Courses (DEC) 	62 04 06 32
	Departmental Subjects Credits (a)	104
b	Allied Management Course (AMC/HMC)	14
c	Generic Open Elective Courses (GEC)	06
Credits (b+c)		20
Grand Total (a+b+c)		124

*In a semester of approximately 14 weeks of teaching

1 credit is equivalent to 1 Theory Hour or 1 Tutorial Hour or 02 Practical hours per week.

Therefore, Maximum No. of Contact Hours in a Semester for various Course types would be as follows:

S.No.	Course Type				Maximum of No. of Contact Hours in a Semester			
	L	T	P	Credits	Theory	Tutorial one per week per group	Practical one per week per group	Total
1.	3	1	0	04	42	14	nil	56
2.	3	0	2	04	42	Nil	28	70
3.	2	0	0	02	28	Nil	nil	28
4.	0	1	2	02	Nil	14	28	42

D) Course Coding

MBA courses offered by the management department (Courses under DCC and DEC categories) would be identified by a course code designated by a six-letter long string of alpha-numeric characters, first three letters by characters and last three letters by numbers. The first letter of character string indicates the level (“B” for bachelors level courses and “M” for Master’s level courses), next two letters of the string indicating the code of the Academic Department offering the course (“MS” for “Department of Management” under the “Faculty of Business Studies”). The last three letters are numbers designating the particular course number. The first number of the last three digits indicates the level (year) at which the course is being offered. The last two numbers denote the serial number of the course, which is an odd number if the course is offered in the Odd Semester and an even number if the course is offered in the Even Semester. For example, the course, “Managerial Economics”, offered in the first semester of MBA by “Department of Management” would be numbered as **MMS-101**.

Allied Management Courses of (Courses under AMC category) would also be identified by a six-letter long string of alpha-numeric characters but the first three letters in this case are “AMC” acronym of “Allied Management Courses”. For MBA first year courses the coding will start from 151 and onwards and 252 onwards for second year courses for being a PG course and codes lower to it been used for BBA courses.

Generic Open Electives (Courses under GEC category) would also be identified by a six-letter long string of alpha-numeric characters but the first three letters in this “GEC-XXX” taken from “Generic Open Elective Courses”.

Teaching Engagements and Definition of Credits

Every course maintains a teaching schedule for which weekly contact hours are decided for delivering lectures (L), engaging tutorials (T) and/or performing practical (P) to make learning in a course more effective. In the syllabi, the information regarding number of course credits

New Teaching Scheme and Syllabus MBA from Academic Year 2021-22 onwards

and contact hours per week is denoted as: Credits (L – T – P); 4 (3-1-0) or 4(3-0-2) or 1(0-0-2) etc.

1 hour of theory session = 1 credit; 1 hour of tutorial session = 1 credit; 2 hour of lab session = 1 credit

EVALUATION SCHEME

Weights for Course Evaluation

Evaluation in every course is based on the weights assigned to various components of the course curriculum. These components are designated as under:

CAT	Continuous Assessment – Theory
CAP	Continuous Assessment - Practical
MTE	Mid Term Evaluation – Theory
ETEP	End Term Evaluation - Practical
ETET	End Term Evaluation – Theory
ETIP	End Term Internal Evaluation -Practical

In general, the relative weights assigned to different components of the entire course are:

S. No	Course Type			Examination		Relative Weights						
	L	T	P	TH	PR	CAT	CAP	MTET	MTE P	ETET	ETIP	ETEP *
1.	3	1	0	Yes	--	10	--	30	--	60	--	--
2.	3	0	2	Yes	Yes	--	10	15	--	60	15	--
3.	2	0	0	Yes	--	10	--	30	--	60	--	--
4.	0	1	2	--	Yes	--	20	--	20	--	60	--

*ETEP is for Project evaluation only (Internal Evaluation: 40, End Term Evaluation: 60). End Term evaluation will be based on Presentation and Viva Voce and will be conducted by External Examiner/Faculty from other Departments.

There will be only one Minor Examination. If a student fails to appear in any of the minor exams due to any reason, the Department may take appropriate decisions. For details of Evaluation Scheme Examination Ordinances of the University shall be referred.

Course Scheme**FIRST YEAR**

First Semester							
S. No.	Course Code	Name of the Course	Category	Workload			Total Credits
				L	T	P	
1.	MMS-101	Management Process and Organizational Behavior	DCC	3	1	-	4
2.	MMS-103	Financial Reporting and Analysis	DCC	3	1	-	4
3.	MMS-105	Marketing Management	DCC	3	1	-	4
4.	MMS-107	Decision Sciences	DCC	3	1	-	4
5.	MMS-109	Legal Aspects of Management	DCC	3	1	-	4
6.	MMS-111	Management Accounting	DCC	2	-	-	2
7.	AMC-151	Managerial Economics	AMC	3	1	-	4

5.		Discipline Elective – II		3	1	-	4
6.		Discipline Elective – III		3	1	-	4
7.		Discipline Elective – IV		3	1	-	4
8.	MMS-208	Research Project Report	DCC	-	-	-	6
9.	GEC-XXX*		GEC	2	-	-	2
Total				21	5	-	32

*Courses offered by various departments (under the basket of GEC Courses) or Courses offered by ANVESHAN Foundation, IGDTUW or MOOC: NPTEL and SWAYAM. With a rider that these courses will not be similar to the courses done under other categories viz, DCC, AMC, DEC and HMC.

Rules Regarding Selection of Discipline/Elective courses for deciding Specialization/Specializations:

There are Six main disciplines for Departmental Elective Courses (DEC).

1. **Finance – DEC-1**
2. **Human Resource Management- DEC-2**

3. **Marketing- DEC-3**
4. **IT Management- DEC-4**
5. **Knowledge Management- DEC-5**
6. **Operations and Supply Chain Management– DEC-6**

In total, eight electives are to be chosen in the second year, that is 3rd and 4th Semesters. In each semester, exactly four electives need to be chosen.

The specialization will be decided as follows:

1. Students can choose either to go for **single or dual specialization** in streams of: Finance, Marketing, HR, IT, KM and OSCM.
2. Minimum four electives from any one discipline leads to “specialization” in that discipline.
3. Choosing at least one specialization is **mandatory** to fulfill the requirements for MBA Degree, that is, choosing minimum four electives from a single discipline is mandatory.
4. Out of the total eight electives, four are required to be chosen from a single discipline for the mandatory specialization in at least one area of the MBA Program. Remaining may be chosen as follows:
 - (i) At least two elective subjects will be chosen from some stream other than mandatory specialization.
 - (ii) Remaining two elective courses may be chosen from any stream including mandatory stream/discipline.
 - (iii) Dual specialization is possible if all four other electives are chosen from a single stream/discipline.

An elective course in a chosen discipline shall be offered only if a minimum of 30% students opt for that elective of that discipline/specialization or a number to be decided by the Competent Authority from time to time.

It may be noted that the degree awarded shall have the nomenclature as Master of Business Administration. If a student is desirous of obtaining a specialization certificate for Major or Minor specialization, a specific request shall be made by the student to the Competent Authority and who shall decide/ issue such certificate as per the examination rules of the University.

LIST OF ELECTIVES

Discipline Specific List of Departmental Elective Courses (DEC)

There are Six main disciplines for Departmental Elective Courses (DEC). In each semester of final year, a student will choose exactly four papers; rules regarding decision of specialization will be applicable as discussed. So, there will be four Discipline Electives in Third semester and four Discipline Electives in Fourth Semester.

Finance – DEC-1

Semester: III

- MMS-209 Investment Management
- MMS-211 Tax Planning and Management
- MMS-213 Investment Banking and Financial Services
- MMS-215 Financial Markets and Institutions
- MMS-217 International Financial Management

Semester: IV

- MMS-210 Corporate Mergers, Acquisitions and Restructuring
- MMS-212 Derivatives and Risk Management
- MMS-214 Financial Modeling and Analysis
- MMS-216 Management Control Systems
- MMS-218 Strategic Cost Management

Human Resource Management- DEC-2

Semester III

- MMS-219 Industrial Relations & Labour Legislation
- MMS-221 Compensation Management
- MMS-223 Organizational Development
- MMS-225 Strategic Human Resource Management
- MMS-227 Changing Paradigms in Leadership

Semester IV

- MMS-220 Cross Cultural and International Human Resource Management
- MMS-222 Performance Management
- MMS-224 Training and Development
- MMS-226 Interpersonal Processes and Counseling Skills for Managers
- MMS-228 Team Building

Marketing- DEC-3

Semester: III

- MMS-229 Consumer Behavior
- MMS-231 Advertising and Brand Management
- MMS-233 Rural and Social Marketing
- MMS-235 International Marketing
- MMS-237 Sales and Distribution Management
- MMS-239 Marketing Research

Semester IV

- MMS-230 Retail Management
- MMS-232 Promotion Management and Business 2 Business Marketing
- MMS-234 Marketing of Services
- MMS-236 Digital Marketing
- MMS-238 Customer Relationship Management
- MMS-240 Entrepreneurial Marketing and Sales

IT Management- DEC-4

Semester: III

- MMS-241 Business Process Reengineering and Change Management
- MMS-243 Business Systems Analysis and Design
- MMS-245 Database Management System
- MMS-247 Data Warehousing and Online Analytical Process
- MMS-249 E-Business
- MMS-251 Knowledge Management and Big Data (Common to Knowledge Management Specialization)

Semester: IV

- MMS-242 E-Governance
- MMS-244 Strategic Telecommunications Management
- MMS-246 Knowledge and Innovation Management
- MMS-248 E-Learning and Knowledge Management (Common to Knowledge Management Specialization)
- MMS-250 KM Tools and E-Businesses (Common to Knowledge Management Specialization)

Knowledge Management- DEC-5

Semester: III

- MMS-253 Knowledge Creation, Critical Thinking and Innovation
- MMS-255 Knowledge Management and Big Data
- MMS-257 Knowledge Creation and Skill Development
- MMS-259 Business Intelligence and Knowledge Management
- MMS-261 Knowledge System Strategy and Development

Semester: IV

- MMS-252 Integrating Knowledge Management with Strategic Initiatives
- MMS-254 Advanced Knowledge Management Concepts
- MMS-256 E Learning and Knowledge Management
- MMS-258 Intellectual Property and Knowledge Capital
- MMS-260 KM Tools and E-Businesses

Operations and Supply Chain Management– DEC-6

Semester: III

- MMS-263 SCM and E-Commerce
- MMS-265 Operations Analytics
- MMS-267 Logistics Planning and Strategy
- MMS-269 Total Quality Management
- MMS-271 Business Process Management and Change
- MMS-273 Computer Aided Design and Manufacturing

Semester: IV

- MMS-262 Supply Chain Strategy and Innovation
- MMS-264 Transportation and Distribution Management
- MMS-266 IT Applications in SCM
- MMS-268 Operations Research and Strategy
- MMS-270 Materials and Store Management

SYLLABUS

FIRST SEMESTER

MANAGEMENT PROCESS AND ORGANIZATIONAL BEHAVIOR	
Course Code: MMS-101 Contact Hours: L-3 T-1 P-0 Course Category: DCC	Credits: 4 Semester: 1

Introduction: This course discusses about the basic nature of management and describes the functions of management, the specific roles of contemporary management, different approaches to designing organizational structures. This will help the students to understand the role of personality, learning and emotions at work, discover and understand the concept of motivation, leadership, power and conflict, understand the foundations of group behavior and the framework for organizational change and development.

Course Objectives: The objective of the course is to help students develop an understanding of the basic management concepts and behavioral processes in organizations, which are important for them to adapt to the changing corporate environment.

Pre-requisite: None

Course Outcomes: After completion of the course, the students should be able to:

1. Understanding the concept of organizational behaviour.
2. Developing an understanding of managerial functions, skills and roles
3. Strengthening the foundations of individual behaviour with an understanding of human personality, perception, learning and emotions
4. Understanding the basic process of interpersonal relationship
5. Understanding how managers can use the models to enhance motivational levels of employees
6. Understand the concept of stress and learn to manage it
7. Understanding the behavioural approach to Managerial decision-making
8. Develop an understanding of teams and groups in organizations
9. Understanding the process of leadership
10. Understanding the various organization structures and their usefulness.

Pedagogy: The teaching pedagogy will be a blend of teaching and learning techniques including:

- Lectures and Case studies
- Project works and assignments
- Group works and Interactive discussions.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents

UNIT-I		10 Hours
Introduction: Meaning and Nature of Management, The evolution of management thought, Functions and skills of a manager. Management Approaches, Processes, Managerial Skills, Tasks and Responsibilities of a Professional Manager.		
UNIT-II		11 Hours
Organizational Structure and Process: Organizational design, six key elements of organizational design, types of organizational design, organizational structure Managerial Ethos. Managing activities: Planning: need for planning, types of planning, and the elements of planning; Managerial decision making- types of managerial decisions, steps in decision-making process. Controlling: Problem Solving Techniques, Controlling: Process and Techniques, Budgetary and Non-Budgetary control techniques, PERT, CPM.		
UNIT-III		10 Hours
Organization Behavior: An Introduction, Behavioral Dynamics, Levels of OB, Foundations of individual behavior, Personality, Perception, Learning, Values, Attitudes, Motivation, Interpersonal Dynamics, Group Dynamics; Leadership theories and styles. Management of conflict and negotiation.		
UNIT IV		11 Hours
Organizational Culture and Change: Organizational culture, Organizational change: nature and forces of change, resistance to change: and management of resistance to change; Work stress: sources and consequences of stress and its management.

FINANCIAL REPORTING AND ANALYSIS	
Course Code: MMS-103 Contact Hours: L-3 T-1 P-0 Course Category: DCC	Credits: 4 Semester: 1

Introduction: Introduction: The course will help the students to understand the commonly used accounting terminologies, the users of accounting information and their respective requirements. This course will enable the learners to have an overall understanding of the Financial Statements of a company, understand the financial statements like the Balance Sheet, Income Statement (Statement of Profit and Loss), Cash Flow Statement and their various elements.

Course Objectives: This course aims at enabling the students understand the contents of financial statements and its analysis. It also sensitizes the students to understand the element and nature of costs, methods and techniques.

Pre-requisite: None

Course Outcomes: After completion of the course, the students should be able to:

1. Understanding how accounting decisions affects real company practices.
2. Understand the concepts of Depreciation, Inventory valuation and the methods employed by Indian Companies.
3. Strengthening the foundations of the analytical approach to Managerial decision-making.
4. Understanding consumer behavior.
5. Understanding the production problem and how managers make input purchase decisions.
6. Understanding the various market structure and how supply is determined in each.
7. Understanding the external environment, common information problems faced/created by managers.

Pedagogy: The teaching pedagogy will be a blend of teaching and learning techniques including:

- Lectures and Case studies
- Project works and assignments
- Group works and Interactive discussions.

Evaluation Scheme:

DECISION SCIENCES	
Course Code: MMS-107 Contact Hours: L-3 T-1 P-0 Course Category: DCC	Credits: 4 Semester: 1

Introduction: This course will build the quantitative aptitude in the students and they will learn data presentation and analysis for management decision-making.

Course Objectives: To equip students with statistical methods, linear programming, probabilistic methods and network analysis and give an exposure to operations research techniques to support business decisions.

Pre-requisite: None

Course Outcomes: After completion of the course, the students should be able to:

1. Develop ability to use statistical methods
2. Learn linear programming tools for decision making
3. Identify opportunities for application of management science tools
4. Develop critical thinking and problem-solving skills.
5. Learn game theory approach for decision making.
6. Learn decision theory and network models.

Pedagogy: The teaching pedagogy will be a blend of teaching and learning techniques including:

- Lectures and Case studies
- Project works and assignments
- Group works and Interactive discussions.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents

UNIT-I		10 Hours
Statistical Methods: Role of statistics in management, Graphical representation of data, Measures of central tendency and dispersion, Standard Deviation, Simple Correlation, Calculation of correlation coefficient, probable error, Rank Correlation, Regression: Linear Regression, Calculation of regression coefficients.		
UNIT-II		10 Hours
Probability Distributions: Introduction to probability theory, Addition and Multiplication Theorem, Conditional Probability, Probability distributions - continuous and discrete (Binomial, Exponential, Poisson and Normal Distributions), Bayes' Rule, Application of Probability theory in decision making, Introduction to Monte Carlo Simulation- concepts and applications in business.		
UNIT-III		11 Hours
Linear Programming: Linear Programming: Formulation and applications, solution through graphical method and Simplex methods, sensitivity analysis, Transportation- Initial Basic Feasible Solution and Test for Optimality and assignment problems- Hungarian Method.		
UNIT IV		11 Hours
Operations Research (Decision Theory and Network Analysis): Decision under Certainty and Uncertainty and Risk, Decision Tree Analysis, Game Theory-Pure and Mixed Strategies, Principle of Dominance, Solution of Game Theory problems with the help of Graphical, Algebraic and Simplex Methods. Network Analysis- Meaning of Networking, Network Analysis with the help of PERT and CPM.

LEGAL ASPECTS OF BUSINESS	
Course Code: MMS-109	Credits: 4
Contact Hours: L-3 T-1 P-0	Semester: 1
Course Category: DCC	

Introduction: This is very important to be familiar with the legal environment for your business. This paper focuses on legal aspects of business.

Course Objectives: This course is to develop an understanding about the legal framework by exposing the students regarding the legal structure and its principles under which a business has to operate.

Course Learning Outcomes:

1. The course will help students recognize when one has a legal issue in various business settings and transactions.
2. The course will enhance student growth in critical thinking and problem solving regarding legal issues by reviewing factual situations and applying sound legal reasoning to reach a conclusion.
3. It will help students acquire knowledge of basic legal terminologies.

Pedagogy: The teaching pedagogy will be a blend of teaching and learning techniques including:

- Lectures and Case studies
- Project works and assignments
- Group works and Interactive discussions.

Evaluation Scheme:

Course Type			Examination		Relative Weights

MANAGEMENT ACCOUNTING	
Course Code: MMS-111 Contact Hours: L-2 T-0 P-0 Course Category: DCC	Credits: 2 Semester: 2

Introduction: This course will help enabling students to understand accounting information and use it for managerial decision making.

Course Objective: To impart skills in using cost concepts for strategic, tactical and managerial decisions so as to facilitate managerial decision-making.

Course Learning Outcomes:

1. Strengthening the foundations of the analytical approach to Managerial decision-making
2. Understanding cost behaviour
3. Understanding how managers make a variety of decisions
4. Understanding the relevance of budgeting and computing variances to undertake performance evaluation
5. Understanding Activity Based Cost Management vs. Traditional Cost Management

Pre-requisite: None

Pedagogy: The teaching pedagogy will be a blend of teaching and learning techniques including:

- Lectures and Case studies
- Project works and assignments
- Group works and Interactive discussions.

Evaluation Scheme:

MANAGERIAL ECONOMICS	
Course Code: AMC-151 Contact Hours: L-3 T-1 P-0 Course Category: AMC	Credits: 4 Semester: 1

Introduction: This course will build the basic concept of Economics and its application in managerial decision-making. Students will learn the tools and techniques of economic analysis.

Course Objectives: The main objective of this course is to familiarize students with the fundamental theories and concepts of Managerial economics and their relevance in business decision-making.

Pre-requisite: None

Course Outcomes: After completion of the course, the students should be able to:

1. Strengthening the foundations of the analytical approach to Managerial decision-making
2. Understanding consumer behaviour
3. Understanding the production problem and how managers make input purchase decisions
4. Understanding the various market structure and how supply is determined in each.
5. Understanding the external environment, common information problems faced/created by managers

Pedagogy: The teaching pedagogy will be a blend of teaching and learning techniques including:

- Lectures and Case studies
- Project works and assignments
- Group works and Interactive discussions.

Evaluation Scheme:

SECOND SEMESTER

HUMAN RESOURCE MANAGEMENT	
Course Code: MMS-102	Credits: 4
Contact Hours: L-3 T-1 P-0	Semester: 2
Course Category: DCC	

Introduction: This course will introduce the practices of managing Human resources in any Organization.

Course Objective: Upon successful completion of this course the student should be able to explain the understanding of the human side of organization, which is central to their performance and effectiveness. This course considers how people, processes and structures interrelate. It focuses to develop an appreciation of the central importance of human resource strategies for all organizations.

Learning Outcome:

1. Students will be able to understand the importance of managing human resources professionally, in view of the constantly changing aspirations of individuals, the business context, and organizational dynamics in the health sector;
2. Students will be able to understand the foundations of managing human resources in organizations, in terms of systems, strategies and practices;
3. Students will be able to appreciate the need for well-designed HR policies that enhance employee motivation and performance;
4. Students will be able to learn the tools and techniques of human resource management systems;
5. Students will be able to understand the dynamics of managing people from real-world examples.

Pre-requisite: None

Pedagogy: The teaching pedagogy will be a blend of teaching and learning techniques including:

- Lectures and Case studies
- Project works and assignments
- Group works and Interactive discussions.

Evaluation Scheme:

FINANCIAL MANAGEMENT	
Course Code: MMS-104	Credits: 4
Contact Hours: L-3 T-1 P-0	Semester: 2
Course Category: DCC	

Introduction: This course will build the basic understanding of finance functions in any organization.

Course Objective: The objective of the course is to help in developing Skills in arranging Finance, making Investment decisions and Managing Working capital, besides examining the contemporary issues in the context of managing corporate finance.

Learning Outcome:

1. Understanding the evolution and growth of the finance function. The objective of the firm – Shareholder wealth maximization.
2. Make Strategic Investment decisions with the help of NPV, IRR and PI techniques. Calculating and interpreting the cost of capital for companies.
3. Financing options available to firms, Trade-off between debt and equity, Criteria for deciding the optimal financing mix.
4. How do managers decide how much to reinvest and how much to return to owners as dividends?
5. Understand the concept of working capital and the working capital policies to manage cash and account receivable for a company.

Pre-requisite: None

Pedagogy: The teaching pedagogy will be a blend of teaching and learning techniques including:

- Lectures and Case studies
- Project works and assignments
- Group works and Interactive discussions.

BUSINESS RESEARCH METHODS	
Course Code: MMS-106 Contact Hours: L-3 T-1 P-0 Course Category: DCC	Credits: 4 Semester: 2

Introduction: To understand the business in better way for making more accurate decisions an understanding of business research methods is required. This course will train the students for business research.

Course Objective: This course aims to make student conversant with the techniques, tools and procedure to conduct research to facilitate decision-making.

Course Learning Outcomes

1. Know different sources of data
2. Ability to summarize and present data to a diverse audience
3. Understand and use sampling and inferential statistics
4. Ability to use spreadsheet software for data analysis and statistical model building
5. Learn management science tool linear and integer programming
6. Identify opportunities for application of management science tools
7. Ability to build and solve linear programming models using spreadsheet software.
8. Develop critical thinking and problem-solving skills.

Pre-requisite: None

Pedagogy: The teaching pedagogy will be a blend of teaching and learning techniques including:

- Lectures and Case studies
- Project works and assignments
- Group works and Interactive discussions.

Evaluation Scheme:

KNOWLEDGE AND INTELLECTUAL CAPITAL MANAGEMENT	
Course Code: MMS-110 Contact Hours: L-3 T-1 P-0 Course Category: DCC	Credits: 4 Semester: 2

Introduction: This course will build the basic understanding of knowledge and intellectual capital management.

Course Objective: This course is to prepare students to manage knowledge and understand the different views of knowledge. It will educate them to examine the contemporary practices, tools of knowledge management (KM) in the context of an organization. It will help the students to examine the ways to utilize explicit knowledge, tacit knowledge and intellectual capital for the competitive advantage keeping ethical, managerial and legal issues.

Course Learning Outcomes:

1. Knowing the history of innovation and its connection to the present
2. Understanding the models of innovation
3. Analysing the role of Intellectual Property Rights and the role of Institutions
4. Understanding the theories and practices of management of innovation
5. Analysing innovation in the context of developing countries

Pre-requisite: None

Pedagogy: The teaching pedagogy will be a blend of teaching and learning techniques including:

- Lectures and Case studies
- Project works and assignments
- Group works and Interactive discussions.

Evaluation Scheme:

ENTREPRENEURSHIP DEVELOPMENT	
Course Code: MMS-203	Credits: 2
Contact Hours: L- 2 T- 0 P-0	Semester: 4
Course Category: DCC	

Introduction: Entrepreneurship is a dynamic process of vision, change, and creation towards the formulation of new innovative ideas and creative solutions. The major emphasis of the course will be on creating a learning ecosystem for promoting and managing innovation in start-ups. It explores successful frameworks, strategies, funding techniques, business models, risks, and barriers for introducing break-through products and services.

Course Objectives: The course aims to develop

- understanding of fundamental knowledge of the phenomenon of innovation, and inculcate personal creativity and entrepreneurial initiative.
- acquaint the students with challenges of starting new ventures and enable them to understand, investigate, and internalize the process of setting up a business.
- understanding the stages of the entrepreneurial process and the resources needed for the successful development of start-ups.
- convert business ideas into successful ventures.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will able to:

- Develop an entrepreneurial mind-set by learning different entrepreneurial traits
- Identify the frameworks to assess opportunities and constraints for new business ideas
- Understand the methodical procedure to select and screen a business idea
- Design strategies for its successful implementation
- Write a business plan.

Pedagogy:

The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights

CHANGING PARADIGMS IN LEADERSHIP	
Course Code: MMS-227 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 3

Introduction: Power and politics are an integral part of organizational dynamics and thus it is pertinent for navigating through the political jungle to wield influence. As an astute head and strategist, a leader should be able to diagnose the negative forces, anticipate moves and handle resistance to the initiatives that he wants to take.

Course Objectives:

The course aims to develop an orientation for implementing complex and long-range decisions through effective leadership, power and influence. The objective of this course is to help students develop their skills in effective use of different forms of influence in the decision-making process, preparing them for leadership positions. The syllabus is intended to facilitate an understanding of the structure and dynamics of negotiation and the appropriate application of persuasion strategies and influence at work and other settings.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Gain insights on how to develop their leadership skills and behaviors.
- Develop perspectives on how to adapt and lead teams more effectively whilst creating a top-line perspective on strategy and implementation

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

ADVERTISING AND BRAND MANAGEMENT	
Course Code: MMS-231 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 3

Introduction:

The course aims at imparting the candidates with basic knowledge of the advertising sale along with detailed aspects of brand management promotion. It will guide students through various approaches to understand the complexities and processes of marketing decision making and the role of advertising and brand management. Especial emphasis is laid on students' understanding of the association between effective advertising and brand success that will improve managerial decision-making with respect to brands. The courses coach the students in digital and new media and its connection with advertising and marketing strategy.

Course Objectives: The basic objective of this courses to:

- Inculcate in students a comprehensive understanding of the theories, models, and processes of Advertising and Branding.
- Gain expertise in applying the analytical concepts and tools of marketing and develop skills in formulating and implementing marketing strategies for brands and businesses.
- Enable students to understand concepts and theories underlying marketing decision making and provide them with a set of approaches to consider when faced with a decision involving understanding customer responses to marketing actions.
- Train students to use statistical techniques to understand empirical data and draw inferences.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Understand how brand value is a good predictor of brand performance.
- Study advertising and its functions in relation to brand success;
- Critically evaluate how innovative ideas and executions will contribute to brand success;
- Analyze advertising and branding techniques and apply them to a wide range of issues;
- Identify important issues related to planning and implementing brand strategies for a diverse group of marketing offerings (e.g., products, services, industrial goods, etc.).

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

RURAL AND SOCIAL MARKETING	
Course Code: MMS-233	Credits: 4
Contact Hours: L-3 T-1 P-1	Semester: 3
Course Category: DEC	

Introduction: Rural market is an imminent segment and has a distinct identity and a separate strategy is required to understand that.

Course Objectives: This paper aims to make students familiar with the uniqueness and differences of rural and social marketing to develop suitable strategic framework for expansion and consolidation in these markets.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to

- Understand rural and social markets.
- Have an idea of Rural Marketing Research
- Understand the application of Strategies in Rural Market and Social Market.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Rural Marketing Introduction: Definition; Myths and Reality of Rural Markets; Characteristics of Rural People; Rural market Environment; Rural Infrastructure; Problems of Rural Marketing as regards Product Positioning; Distributions; Language; Media; Transport etc. Challenges for Rural Marketing		
UNIT-II		10 Hours
Rural Marketing Strategies: Rural Market, Segmentation; Product Strategies; Pricing, Strategies; Promotion Strategies; Distribution Strategies.		
UNIT-III		11 Hours
Rural Marketing Research: Role of IT in Rural Marketing (e-Chaupals etc.) with few case studies; Marketing of Rural and Cottage Industry Products. Future of Rural Marketing in India.		
Foundation of Social Marketing: Definition; Nature and Scope; Social Marketing Challenges; Conceptual Framework of Social Marketing; Need for Social Marketing.		
UNIT IV		11 Hours
Social Marketing Strategies and Applications: Social Markets Segmentation; Product Strategies; Marketing Mix; Pricing Strategies		
Promoter Strategies: Role of Govt. and NGOs in Social Marketing; Social Marketing; Applied in Family Planning; Medicare; Small Savings; AIDS Prevention, Swacch Bharat Abhiyan, Ujjwala Yojna, Beti Padhao-Beti Bachao.		
Text Books

INTERNATIONAL MARKETING	
Course Code: MMS-235 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 3

Introduction:

The course is designed bearing in mind the global marketplaces and underlines the importance of cultural diversity for businesses to respond effectively to diverse market conditions. It also studies the macro and micro-environmental factors which help identify and evaluate market entry strategies. Students explore all aspects of marketing from a global perspective to better respond to international opportunities and competitive situations.

Course Objectives:

This course aims at understanding the theoretical and conceptual principles of international marketing. The objective is to develop an insight in cross-cultural marketing issues across borders and developing an understanding of marketing implications in design and implementation of successful international marketing programs. The purpose is to understand how to develop and manage a strategic international marketing initiative.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Examine the environmental variables that affect international marketing;
- Define the strategies that can lead to successful international marketing given the macro and micro environmental constraints;
- Discuss the management decisions and problems, highlighting those specific to the international arena;
- Understand how managers accomplish the functional tasks that constitute international marketing such as marketing intelligence and “mix” adaptations;
- Prepare a comprehensive international marketing plan.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
International Marketing: Meaning, Nature and Importance; International Marketing Orientation: E.P.R.G – Approach: An overview of the International Marketing Management Process; International Marketing Environment.		
UNIT-II		10 Hours
International Market Segmentation and Positioning: Screening and Selection of Markets; International Market Entry Strategies: Exporting, licensing, Contract Manufacturing, Joint Venture, M&A, Setting up Wholly Owned Subsidiaries Abroad, Strategic Alliances.		
UNIT-III		11 Hours
International Product and Pricing Strategies: Product Designing, Product Standardization Vs Adaptation, Managing Product Line, International Trade Product Life Cycle, New Product Development; Pricing for International Markets; Factors affecting International Price Determination.		
UNIT IV		11 Hours
Managing International Distribution and Promotional Distribution Channel Strategies: - International distribution Channels- their roles and functions; Selection and Management of overseas agents, international distribution logistics.

SALES AND DISTRIBUTION MANAGEMENT	
Course Code: MMS-237	Credits: 4
Contact Hours: L-3 T-1 P-0	Semester: 3
Course Category: DEC	

Introduction:

With customers at the centre of the economic universe, competition catches up quickly with fast growing corporations. In this era, while we focus on advancing technologies which make it possible to produce and distribute goods and services at speed, human performance remains the most important factor contributing to the effective functioning of a firm with its customers. Hence, a company's sales team and channel partners have a larger role to play in fulfilling organisational objectives. The sales and distribution function of a modern-day corporation must not merely sell products; they must also be actively involved in solving customer problems and building a long-lasting relationship with them.

Course Objectives:

This course is designed to impart the necessary knowledge and skills necessary to manage the downstream part of the value chain of an organization i.e., the sales and distribution. This course will make students appreciate that globalization has affected competition, communication, information technology, and customer orientation which in turn have made sales and distribution management extremely important. This course will help the participants to develop critical skills for generating, evaluating and selecting sales and distribution strategies. This subject will cover the concepts, attitudes, techniques and approaches required for effective decision making in the areas of Sales and Distribution.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Understand & appreciate the diverse variables affecting the sales & distribution function
- Apply concepts related to improving performance of Sales Team
- Analyze roles and responsibilities of a Sales and Marketing Manager
- Design and implement sales and distribution plans
- Link distribution with other marketing variables

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Introduction to Sales Management: Marketing vs Selling, Importance and scope of selling, selling theories, sales function and multi-sales-channel, Personal selling Process, Sales organization structure, sales forecasting, ethical issues in selling.		
UNIT-II		10 Hours
Territory Design and Sales Quota		
Approaches and techniques to design sales territories, Sales quota; procedure, types and methods, sales contests, analysis and controlling of sales personnel, sales analysis, cost and profitability.		
UNIT-III		11 Hours
Distribution Channel Functions and Institutions: Value creation by intermediaries, channel structure in FMCG, Industrial Goods and Services in India, Online Vs Offline, selection, channel power and channel conflict, operational issues in channel management, motivation and evaluation of channel members.		
UNIT IV		11 Hours
Physical Distribution System: Objective and scope; An overview of Logistics Management; Transportation and Warehousing Decisions, application of new age technology in logistics and transportation, developing competitive advantages through physical distribution.

MARKETING RESEARCH	
Course Code: MMS-239 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 3

Introduction:

The Marketing Research paper aims to improve the students marketing and business decision making skills. This module gives the student a firm foundation of the relationship between Management and Market Research. The issue facing managers is not a shortage of information but how to use the available information to make better decisions. Therefore, the course has been designed to develop familiarity with application of statistical methods in managerial problem solving and decision-making.

Course Objectives: The basic objective of this course is to:

- Develop theoretical and practical understanding of marketing research concepts, tools and techniques in decision making.
- To empower students to develop data analytics skills for meaningful interpretation of the data sets for solving the business/research problems.
- To learn different research methods, and when to use them.
- To master the necessary skills for conducting research, including situation analysis, research design, data collection and analysis, and preparing the research report.
- To gain knowledge in evaluating the research results by reviewing real world examples and attaining managerial skill of being a critical consumer of marketing research.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Outline the basic concepts associated with marketing research.
- Explain the concepts about contemporary marketing research.
- Develop understanding on various kinds of research, objectives of doing research, research process, research designs and sampling.
- Code and analyze the data.
- Interpret and present research reports for the purpose of evaluating the adequacy of the research design, and making managerial decisions based on research reports.
- Apply research in the marketing area.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Foundations of Marketing Research: Meaning, objectives, motivation and utility of marketing research. Characteristics of scientific methods. Marketing research process. Defining a research problem and developing a research approach; the need of different types of research; types of marketing problems. Writing a research proposal.		
UNIT-II		10 Hours
Research Design: Concept and Importance in Research - Features of a good research design– Exploratory Research Design – concept, types and uses, Descriptive Research Designs - concept and uses, cross sectional and longitudinal studies. Experimental Design: Causal relationships, Concept of Independent & Dependent variables, extraneous variable, Treatment, Control group.		
UNIT-III		11 Hours
Measurement and Attitude Scaling: Concept, problems in measurement of marketing research variables, levels of measurement: Nominal, Ordinal, Interval, and Ratio. Comparative and non-comparative scaling techniques: Rating Scales viz. Likert Scales, Semantic Differential Scales, Constant Sum Scales, Graphic Rating Scales – Ranking Scales – Paired Comparison & Forced Ranking. Projective techniques. Data Collection: Sources of data; use and appraisal of existing information, primary and secondary data; Information from respondents, sampling design and questionnaire design, interviewing, various methods of survey/ data collection, email/ internet survey.		
UNIT IV		11 Hours
Data Analysis: Hands on session on tools like SPSS for data analysis techniques like factor analysis, correlation and regression, discriminant analysis for analyzing qualitative as well as quantitative data. Report preparation and Presentation: Research reports; types, layout and structure of research reports, precautions in writing research reports, referencing styles. Ethical issues in marketing research.

BUSINESS PROCESS REENGINEERING AND CHANGE MANAGEMENT											
Course Code: MMS-241						Credits: 4					
Contact Hours: L-3 T- 1 P-0						Semester: 3					
Course Category: DEC											

Introduction: Business Process Reengineering implementation often leads to fundamental changes within an organization's structure and management process. BPR is a tool for significant change in organization performance. Adjusting the thinking which has led to the present scenario is the greater priority. Change management is people-oriented as it studies the effects brought by the change.

Course Objectives: This course introduces the students to the issues and opportunities provided by Business Process Reengineering. The course stresses how change management helps to ease the process of BPR.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to

- Understanding various BPR methodologies and their applications
- Appreciate various alternative techniques of BPR – TQM, Work Study, Benchmarking and their applications
- Develop a draft change management policy
- Support staff and help them understand the change process

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Introduction to Business Process Reengineering: Concept of Business Process Reengineering, Definition, Nature, Significance and rationale of Business Process Reengineering, Reengineering scenario in Indian Organization in comparison to global level, Problems issues, scope and trends in BPR.		
UNIT-II		11 Hours
Strategic aspects of Business Process Reengineering: Implementing BPR, Methodology and steps, IT enabled reengineering, Strategic aspects of BPR, BPR and Total Quality Management, the paradigm of Mass customization, managing organizational change, Lean manufacturing and Total Quality Management, Principles of Total Quality Management, Just in Time philosophy.		
UNIT-III		10 Hours
Process Mapping: Types of process maps, Flow Charts, Swim Lanes Diagram, SIPOC, Value Stream Mapping, Transforming/ Reinventing the enterprise, Team building, Measurement issues in BPR, Assess Business Processes using established Performance Metrics, Case studies of success as well as failure.		
UNIT IV		11 Hours
Change Management: People view, empowering people, reengineering management. Issues of purpose, culture, process and performance, Change and Management of BPR, Process of Change, Stages in Change, Different change agents in an organization.

BUSINESS SYSTEMS ANALYSIS AND DESIGN	
Course Code: MMS-243 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 3

Introduction: This course will introduce the basic concepts underlying systems analysis and design, focusing on contextual inquiry/design and data modelling, as well as the application of those analytical techniques in the analysis and design of organizational information systems.

Course Objectives: To equip students with techniques for undertaking requirement analysis and designing IT based systems.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to

- Apply object-oriented concepts to capture business requirements.
- Design and Develop of Information Systems in a real-world business environment.
- Students would be able to design and manage projects, analyze and document systems, design new systems and implement their plans.
- Gain in depth knowledge of software systems engineering, data modelling to business intelligence, project management and business engineering with ERP solutions.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Introduction: Business and technology drivers of information systems, Information systems building blocks, stakeholders' perspectives, Issues related to planning, implementation and maintenance of IT based Systems.		
UNIT-II		11 Hours
Requirement Analysis: Systems development life cycle, Software development process models, software requirement specification, Fact finding techniques for requirement analysis.		
UNIT-III		10 Hours
Requirement Modelling: Modelling system requirements with Use Cases, Sequence diagrams, Data modelling, Process modelling, Object oriented analysis		
UNIT IV		11 Hours
Systems Design: Design of input, process and output subsystems including user interface design, database design and object-oriented design, software application architecture		
Text Books

DATABASE MANAGEMENT SYSTEM	
Course Code: MMS-245 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 3

Introduction: Database Management System (DBMS) is a Software for data storage & retrieval, for creating user interface (forms), reports, and for administering a DB system (security, access, etc.). An implementation of a DBMS product to support various information needs in a company includes one or more databases, logic (business rules), backend code and user interface. An information system that is built from “applying” a DBMS or a database to a specific domain, supports specific information needs.

Course Objectives: To equip students with techniques for undertaking requirement analysis and designing IT based systems.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to

- Use the basics of SQL and construct queries using SQL in database creation and interaction.
- Analyze a problem, and identify and define the computing requirements appropriate to its solution.
- Design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs.
- Recognize major software architectural styles, design patterns, and frameworks.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		11 Hours
Introduction: File Systems and Database; Components of Database Management Systems, Advantages of DBMS; Database Management Models: Relational, Network, Hierarchical, Object Oriented.		
UNIT-II		10 Hours
Logical Data Modelling: Entity-Relationship Data Model, Normalization and its significance and different levels of normalization		
UNIT-III		10 Hours
Relational Database Design: Physical Database Design, Integrity Constraints, database security and disaster recovery strategies.		
UNIT IV		11 Hours
Querying RDBMS: Structured Query Language (Data Definition, Data Manipulation, Data Control), Aggregate Functions, Nested Sub Queries, Views. NOSQL Database Features of NoSQL, Datatypes, Benefits of NoSQL.		
Text Books

DATA WAREHOUSING AND ONLINE ANALYTICAL PROCESS	
Course Code: MMS-247 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 3

Introduction: This course discusses the basics of database and DBMS along with the procedure of constructing and using a data warehouse. It also aims at imparting knowledge about how to perform complex analytical calculations and data discovery.

Course Objectives: To equip students with techniques of maintaining organizational data in structured form for easy retrieval and decision making

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Create, modify, store and retrieve data.
- Define the structure of data elements and to set relationships between them.
- Design an efficient and normalized relational database schema, create indexes and implement views.
- Easily get the information from data at high efficiency and store huge amount of data structured or unstructured.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		11 Hours
Concept of Data Warehouse: Differences between operational database systems and data warehouse, Uses of Data warehouse, Justifying a Data warehouse, Contents of Data warehouse.		
UNIT-II		10 Hours
Data Warehouse Modelling: Data Cube: A Multidimensional data model, Schemas: Stars, Snowflakes and fact constellations, Data warehouse design process, Data Mart.		
UNIT-III		10 Hours
Populating a Data Warehouse: ETL: Data extraction, Transformation, Cleansing, Loading, Data Warehouse Information flows.		
UNIT IV		11 Hours
Analyzing the contents of a data warehouse: Online analytical processing (OLAP), OLAP operations: Roll-up, Drill-down, drill-across, drill-through, Slice and dice, Pivot, Concept of data mining, using data warehouse for business intelligence. Data Analytics: Descriptive analytics, Prescriptive analytics and Predictive analytics.

E-BUSINESS	
Course Code: MMS-249 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 3

Introduction: This course aims to provide knowledge about the basics of e-commerce and e-business and the various security threats and protocols associated with it along with the various ways of Electronic Payment System (EPS). Besides, how to launch and run your own e-commerce business.

Course Objectives: The course aims to enlighten students with various components of e-business, technological and non-technological challenges, strategies of e-business, security and payment systems, and issues related to launching of e-business.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Understand consumer needs
- Detects various security threats and how to prevent them.
- Get aware about various electronic payment systems and their functionalities.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

KNOWLEDGE MANAGEMENT AND BIG DATA (Common with Knowledge Management Specialization)	
Course Code: MMS-251	Credits: 4
Contact Hours: L-3 T-1 P-0	Semester: 3
Course Category: DEC	

Introduction: Modern management education is incomplete without Big Data. This paper introduces the relation between Big Data and Knowledge Management.

Course Objectives: This course introduces the students to issues and opportunities in the area of Big Data and Knowledge Management. The course stresses the use of Big Data in business growth with special emphasis on Knowledge Management.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to

- Understand the role of big data in knowledge management
- Understand the role of big data in the larger business context
- Understand the symbiotic relationship between big data and knowledge management

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights

KNOWLEDGE CREATION, CRITICAL THINKING AND INNOVATION	
Course Code: MMS-253 Contact Hours: L-3 T- 1 P-0 Course Category: DEC	Credits: 4 Semester: 3

Introduction: The course discusses the relationship between knowledge frameworks in an organization for innovation. This course will help students understand the role of critical thinking for Innovation.

Course Objectives: The course is to recognize that knowledge is the most important resource and it holds the key to generating continuous innovation. The students after studying this course will be able to manage and understand the relationship amongst Knowledge Creation, Critical Thinking and Innovation.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to

- Understand the relationship between knowledge frameworks in an organization for innovation.
- Understand the role of critical thinking for innovation
- Understand the innovation process in an organization.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Introduction to Knowledge and Knowledge Management: Types of Knowledge and Implication for Knowledge Management, Knowledge Creation, Models of Knowledge Creation, Nonaka’s Model of Knowledge Creation and Transformation.		
UNIT-II		11 Hours
Knowledge Creation and Critical Thinking: Knowledge Creation at the Level of the Individual, Group and Organization, The Nature of Technical Problem Solving, Formulating Knowledge, Explicit and Codifying Knowledge, Tacit, Implicit and Sticky Knowledge, Knowledge Management Lifecycle, Critical Thinking and Knowledge Management.		
UNIT-III		10 Hours
Knowledge Acquisition and IPR: Knowledge Acquisition Principles and Process, Techniques to Elicit Tacit Knowledge, Tools Used to Codify Explicit Knowledge, Knowledge Acquisition Techniques, Knowledge Protection and Issues in Intellectual Property Rights.		
UNIT IV		11 Hours
Barriers and Enablers: Barriers and Enablers to Knowledge Creation, Knowledge Transfer and Sharing, Innovation Vs Creativity, Managing for Innovation, Innovation and Knowledge Management, Typology of Design Driven Innovation.		
Text Books		
1	Krogh, G.V., Luchijo, K., Nonaka, I. (2000), “Enabling Knowledge Creation”, Oxford University Press.

KNOWLEDGE MANAGEMENT AND BIG DATA	
Course Code: MMS-255	Credits: 4
Contact Hours: L-3 T-1 P-0	Semester: 3
Course Category: DEC	

Introduction: Modern management education is incomplete without Big Data. This paper introduces the relation between Big Data and Knowledge Management.

Course Objectives: This course introduces the students to issues and opportunities in the area of Big Data and Knowledge Management. The course stresses the use of Big Data in business growth with special emphasis on Knowledge Management.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to

- Understand the role of big data in knowledge management
- Understand the role of big data in the larger business context
- Understand the symbiotic relationship between big data and knowledge management

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Introduction: History of KM, KM Processes and Frameworks, KM Tools and Practices, Technical KM Tools, Soft KM Tools, Introduction to Big Data, Characterization of Big Data: Volume, Velocity, Variety (V3), Classic Data Vs Big Data.		
UNIT-II		10 Hours
Big Data Value Chain: Big Data Tools, Techniques, Application, Data Sources and Capture, Value of Data, Data Quality Management, Management of Big Data, Basic Database Architecture, Design of Database, Database Management Systems, The Stack Ecosystem.		
UNIT-III		11 Hours
Cloud Computing: Introduction to Cloud Computing, Cloud Services and Cloud Based KM Systems, The Knowledge Cloud, Managing Knowledge in the Age of Digitalization, Principles of Data Governance, Data Warehousing and Data Mining, Open Structured and Un Structured Information.		
UNIT IV		11 Hours
Business Intelligence: Introduction to Business Intelligence System Thinking for the Use of Information, Internet of Things, Social-Media, Sentiment Analysis, Semantic Technology, Business Innovation Using Big Data Analytics and Case Studies, Predictive Analysis, Relationship Between KM and Big Data.		
Text Books

KNOWLEDGE CREATION AND SKILL DEVELOPMENT	
Course Code: MMS-257 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 3

Introduction: Management is all about ideas and to instill the ability to think new ideas will make the management students ready for the industry challenges.

Course Objectives: This course aims at presenting the latest management ideas in knowledge creation and management. Each unit is a practical guide to managers who want to learn what can be ways of knowledge creation in an organization. All chapters are based on careful research. The emphasis is on the practical applications of knowledge to a wide variety of organizations and functional areas.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to :

- Understand the role of skill development for knowledge creation
- Understand the of knowledge management in skill upgrade
- Understand the importance of skill development for knowledge of functional areas.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		11 Hours
Knowledge Creation: Introduction to Knowledge Creation, Policy Perspectives on knowledge, Different forms of collective learning, Attributes of effective learning Communities, A framework for Knowledge creation.		
UNIT-II		10 Hours
Organizational Learning and process of Knowledge Creation: The cycle of knowledge creation, enabling conditions of Knowledge creation, Developing the power of Knowledge, Levels of Organizational Learning, The evolution of ‘Practice Fields’, Organizational Learning Dimensions.		
UNIT-III		11 Hours
Knowledge Creation and Skill Development: Introduction to Skill Development, Skill Development I, information systems, Knowledge creation and skill development II: social media, Knowledge creation and skill development III: distribution, Forecasting and back casting		
UNIT IV		10 Hours
Linking KM and Skill Development: KM and Skill Development tools, Diagnostic Technologies and their value, data management, information technology and organizational productivity in relation to development of new skills at the workplace, Web centric knowledge skill development, Applications of Knowledge management.		
Text Books

BUSINESS INTELLIGENCE AND KNOWLEDGE MANAGEMENT	
Course Code: MMS-259	Credits: 4
Contact Hours: L-3 T-1 P-0	Semester: 3
Course Category: DEC	

Introduction: information systems can be used to generate and exploit organizational knowledge to support management decision making. Business Intelligence can link the decision making with available resources and make the decision more precise.

Course Objectives: This module will examine the concept, principles and practice of knowledge management and business intelligence. It discusses the ways in which information systems can be used to generate and exploit organizational knowledge to support management decision making. It will equip you with analytical skills relevant to an organizational context and how to effectively present the results of your analyses in a report.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Understand the components of business intelligence
- Understand the relationship between business intelligence and knowledge management
- Understand how business intelligence and knowledge management create unique value for the organization.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		11 Hours
Introduction to Business Intelligence: Framework, Business Intelligence Architecture and Components, BI creation and use of BI governance and intelligence, Main theories and characteristics of Business Intelligence, Moving Forward to Competitive Intelligence, Implementing Business Intelligence.		
UNIT-II		10 Hours
Decision support systems: Types and components, expert systems, machine learning and n management support modeling, Knowledge Representation and Reasoning, Knowledge acquisition, Verification and Validation, Uncertainty Modeling, Business Rules and management.		
UNIT-III		11 Hours
Knowledge Discovery and Analytics: Introduction to Data Mining, KDD Process, Tasks and techniques: Clustering, Decision trees, Association rules, ANN, SVM, Toolset: Rapid Miner or Weka, Web Mining, Social Network Mining, Text mining, Process mining.		
UNIT IV		10 Hours
Data Warehousing Definitions and Concepts: The Data Warehousing Process, Architectures of Data Warehousing, Data integration and ETL processes - Extraction, Transformation and Loading, Development of Data Warehouses., The Future of Business Intelligence		
Text Books		
1	Hennig, U. (2013), “Knowledge Management and Business Intelligence”, Springer Publishing.	
2	Keyes, J. (2013), “Knowledge Management, Business Intelligence, and Content Management: The IT Practitioner’s Guide”, (1st Ed.), Auerbach Publications.

KNOWLEDGE SYSTEM STRATEGY AND DEVELOPMENT	
Course Code: MMS-261 Contact Hours: L-3 T- 1 P-0 Course Category: DEC	Credits: 4 Semester: 3

Introduction: If used precisely, knowledge management can be used as a strategic resource for the Organization. For that an understanding of knowledge system is required.

Course Objectives: The focus of this course is to understand how Knowledge Management is a key for the competitive edge over the competitors. The course prepares the students to leverage Knowledge Management as a Strategic Resource for the organization.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Understand the role of knowledge management for competitive advantage
- Understand the role of knowledge management in strategy development
- Understand the role of knowledge management for strategic depth of an organization

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Introduction to KM Strategies: Need for Knowledge Management Strategies, Developing Organizational KM Strategies, Prioritizing Knowledge Strategies, Knowledge as a Strategic Asset, Elements of Knowledge Strategy.		
UNIT-II		10 Hours
Strategy for Knowledge Management: Strategic Decision-Making Process, Strategy Analysis, Describing Current It Situation, Describing Current and Desired Business Situation, Knowledge Management Analysis, Analyzing Needs for Change.		
UNIT-III		11 Hours
Strategy Choice: Identifying Alternative Actions, Selecting Appropriate Actions, Knowledge Management Action, Making the Plan, Strategy Implementation, Implementing Plan, Barriers to Implementation, Knowledge Management Technology Architecture, Evaluating Results.		
UNIT IV		11 Hours
Strategic Knowledge Management Tools and Techniques: Building KM into Strategic Framework, The Impact of Strategic Knowledge Management on Organization, Leadership and Knowledge Management, Business Process Analysis and Management, Related Case Studies.		
Text Books		
1	Gottschalk, P. (2005), “Strategic Knowledge Management Technology”, Idea Group Inc.

SCM AND E-COMMERCE	
Course Code: MMS-263 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 3

Introduction: This course provides an understanding of fundamental concepts of supply chain management. All functional areas of supply chain management are explored in an integrated view of procurement, manufacturing and operations management, transportation and logistics, inventory and warehousing, demand planning, scheduling, network design, collaboration and performance measurement.

Course Objectives: To develop an understanding of Supply Chain Management and E-Commerce and how it can provide a competitive advantage in the marketplace. To develop knowledge of the issues related to designing and managing SCM and the techniques to do so.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to understand:

- Supply Chain IT Framework
- Supply Chain Information Systems
- Digital Markets & Efficient Supply Chains
- E - Supply Chain Opportunities

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Supply Chain IT Framework: Supplier Relationship Management, Internal Supply Chain Management, Customer Relationship Management, Transaction Management Foundation.		
UNIT-II		11 Hours
Supply Chain Information Systems: SC Information System classification, Requirement Analysis for Information Systems in SC, Information for Strategic SC decisions, Risks & Challenges in implementing SC Information Systems, Benefits of SC Information Systems.		
UNIT-III		10 Hours
Digital Markets & Efficient Supply Chains: Web enabled Supply Chains, Technological impact of SC disintermediation, Reconfiguration of SC, Pure technology applications in SC, Process Improvements - technology adoption.		
UNIT IV		11 Hours
E - Supply Chain Opportunities: E business & SCM – Upstream Perspective, B-2-B Perspective, E supply chain opportunities - e procurement, e fulfillment, auctions & reverse auctions, collaborative demand planning, intranets, extranets & VPN, Benefits to SMEs &MSMEs.		
Text Books

OPERATIONS ANALYTICS	
COURSE CODE: MMS-265	CREDITS: 4
CONTACT HOURS: L-3 T- 1 P-0	SEMESTER: 3
COURSE CATEGORY: DEC	

Introduction: Operation research techniques facilitate in making strategic decisions based on data for the given managerial problems in the set up modern management complex environment.

Course Objectives: To develop an understanding of the analytics within an organization. To make students understand how to use operations research techniques.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to understand:

- Decision problems using linear programming, interpreting the results and sensitivity analysis
- Integer Programming (IP) problems, mixed-integer and zero-one programming.
- Multi-criteria decision making (MCDM) techniques.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Introduction: Introduction to Operations Research (OR), linear programming (LP), formulating decision problems using linear programming, interpreting the results and sensitivity analysis.		
UNIT-II		11 Hours
Linear Programming: Multi-period LP models. Applications of linear programming in product mix, blending, cutting stock, transportation, transshipment, assignment, scheduling, planning and revenue management problems. Network models and project planning.		
UNIT-III		10 Hours
Integer Programming: Integer Programming (IP) problems, mixed-integer and zero-one programming. Applications of IP in capital budgeting, location decisions.		
UNIT IV		11 Hours
Multi-criteria decision making (MCDM) techniques: Goal Programming (GP) and analytic hierarchy process (AHP) Nonlinear programming, portfolio theory.		
Text Books

LOGISTICS PLANNING AND STRATEGY	
Course Code: MMS-267 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 3

Introduction: Logistics is the process that creates value by timing and positioning inventory; it is the combination of a firm's order management, inventory, transportation, warehousing, materials handling, and packaging as integrated throughout a facility network. Logistics planning serves to link and synchronize the overall supply chain as a continuous process and is essential for effective supply chain connectivity.

Course Objectives: To make students understand how Logistics impacts all areas of the firm. To provide insights into Logistics linkages with Organization and Customers value.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to understand:

- Logistics in the economy a macro perspective
- Problems with fragmented logistics, Integrating logistics within an organization,
- Approaches to analyzing logistics systems

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Context of Logistics: Introduction, definitions, logistics in the economy a macro perspective, aim of logistics, activities of logistics, value added role of logistics.		
UNIT-II		10Hours
Logistics in the firm: Micro dimensions of logistics, interface with operations, manufacturing, marketing, supply chain, Problems with fragmented logistics, integrating logistics within an organization, integrating logistics along the SC.		
UNIT-III		11 Hours
Approaches to analyzing logistics systems: Materials Management v/s physical distribution, Cost centers, nodes v/s links, logistics channel, cost perspective & level of optimality, short run or static analysis, long run or dynamic analysis.		
UNIT IV		11 Hours
Logistics Relationships: Types of relationships, Competitive relationship, product relationship, spatial relationship, intensity of involvement, logistics outsourcing activities – concept & types of 3PL, 4PL, need for collaborative relationships.		
Text Books		
1	Coyle, J.J., Bardi, E.J., Langley, C.J., “The Management of Business Logistics”, (7th Ed.), Cengage Learning India Ed.

2	Christopher, M. (2016), “Logistics and Supply Chain Management (Financial Times Series)”, F.T. Press.	

TOTAL QUALITY MANAGEMENT	
Course Code: MMS-269 Contact Hours: L-3 T- 1 P-0 Course Category: DEC	Credits: 4 Semester: 3

Introduction: Total Quality Management (TQM) describes the management approach to long-term success through customer satisfaction. In modern day management, all members of an organization participate in improving processes, products, services, and the culture in which they work.

Course Objectives: To give various perspectives on Quality and various contributors to Quality. To provide an in-depth understanding of the various QC tools. To introduce the frameworks of the Global Quality Award.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to understand:

- Quality Concepts and Quality Cost perspective
- Philosophies: -Deming's 14-point philosophy, Joran, Crosby philosophy
- Quality Tools: Check list, Flow Chart, Tally charts and Histograms etc.
- Statistical Quality Control and Quality Management Awards and frameworks:

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		11 Hours
Introduction: Quality Concepts defined, Quality Cost perspective, Cost of Quality, Quality Function, Internal and external quality perspective. Goods and service quality. Cost of poor quality, internal failure cost and external failure cost, appraisal cost, Prevention cost, Analysis of quality cost, hidden quality cost.		
UNIT-II		10 Hours
Philosophies: Deming's 14-point philosophy, Juran, Crosby philosophy, Ishikawa, Taguchi, Feigenbaum. Comparison of quality philosophy.		
UNIT-III		11 Hours
Quality Tools: Check list, Flow Chart, Tally charts and Histograms, Graphs, Pareto Analysis, Cause and Effect, Scatter diagram and regression analysis. Quality Function Deployment-Introduction, Customer needs, Customer priorities and competitive comparisons and planned improvements, Design features or requirements.		
UNIT IV		10 Hours
Statistical Quality Control: Necessity and Importance of SQC, Process capability, Six Sigma quality, Process control, Process.		
Text Books

BUSINESS PROCESS MANAGEMENT AND CHANGE	
Course Code: MMS-271 Contact Hours: L-3 T- 1 P-0 Course Category: DEC	Credits: 4 Semester: 3

Introduction: Business process reengineering is the act of recreating a core business process with the goal of improving product output, quality, or reducing costs. This paper aims to introduce the students with such concepts and learn about the techniques of business process reengineering.

Course Objectives: The course will make the students conceptualize business operations as processes. After the course they can model simple business processes in terms of the actors and activity sequences involved, the data flowing through those sequences and the dependencies between data and business activities. This course will provide theory with hands-on exercises integrating core concepts of Process Mapping.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to

- Understand Business Processes
- Process Mapping and Business Improvement Methodologies
- Business Process Re-engineering and Business Process Management
- Business Process Management and Change Management

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		11 Hours
Introduction to Business Processes: Processes and Information, Task, Activity, Process, Sub Processes, Conceptualization of business activities as processes, Business Process, Process Mapping, Process Modeling, Business Process Improvement, Nature, significance and rationale of Business Process Improvement, Cases to understand the basics of Business Process.		
UNIT-II		10 Hours
Process Mapping and Business Improvement Methodologies: Flow Charts, Swim Lanes Diagram, SIPOC, Value Stream Mapping, Identification of Value Adding Tasks and Non-Value Adding Tasks, Analyze and Assess Business Processes using established Performance Metrics, Lean manufacturing and Total Quality Management, Principles of Total Quality Management, Just in Time philosophy.		
UNIT-III		11 Hours
Business Process Re-engineering and Business Process Management: Business Process Re-engineering, Radical Change, Clean Sheet Rethinking, Principles of Business Process Management, Cause and Effect, Ishikawa, Pareto Charts, Concept of Business Process Management and its relationships with Total Quality Management, Business Process Reengineering and Enterprise Resource Planning, Ways to improve the efficiency and effectiveness of existing processes		
UNIT IV		10 Hours
Business Process Management and Change Management: Change, Change Management, Need and Rationale of Change, Individual Level Change, Organizational Level Change, People View, Empowering People, Process of Change, Model of Change, Equation of Change, Change Levers and Managing Change, A Simulation Exercise to implement a Change Initiative in an Organization.		
Text Books

COMPUTER AIDED DESIGN AND MANUFACTURING	
Course Code: MMS-273 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 3

Introduction: In Manufacturing, the use of computers has become imminent especially CAD. Understanding of the CAD concept in manufacturing gives an added advantage to the managers.

Course Objectives: To understand the role and objectives of Computer Aided Design. To appreciate the increasing scope of manufacturing and its future challenges.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to understand:

- Types of system, CAD/CAM system evaluation Criteria
- Parametric representation of surfaces, plane surface, ruled surface
- Feature based modeling and Parametric and variational modeling

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		11 Hours
Introduction: Definition of CAD Tools, Types of system, CAD/CAM system evaluation Criteria, Graphics standards, functional areas of CAD, Modeling and viewing, software documentation, efficient use of CAD software.		
UNIT-II		10 Hours
Representation: Mathematical representation of surfaces, Surface model, Surface entities, surface representation, Parametric representation of surfaces, plane surface, ruled surface, surface of revolution, Tabulated surface.		
UNIT-III		11 Hours
Modeling-I: Feature Based Modeling, Assembly Modeling, Behavioral Modeling, Conceptual Design & Top-down Design. Techniques for visual realism - hidden line - Surface removal - Algorithms for shading and Rendering. Parametric and variational modeling, Feature recognition, Design by features, Assembly and Tolerance Modeling,		
UNIT IV		10 Hours
Modeling-II: Parametric and variational modeling, Feature recognition, Design by features, Assembly and Tolerance Modeling, Tolerance representation - specification, analysis and synthesis, AI in Design.

FOURTH SEMESTER

PROJECT MANAGEMENT	
Course Code: MMS-202	Credits: 4
Contact Hours: L-3 T-1 P-0	Semester: 4
Course Category: DCC	

Introduction: Project Management deals with seeking new methods of planning, organizing, and controlling non-routine tasks. The management of a project differs in several ways from management of a typical enterprise. The goal of a project team is to accomplish its prescribed mission and then disband; though this is easier said than done. Project Management has been around for some time, though it has recently become more important because of the shifting emphasis on teams in accomplishing tasks.

Course Objectives: To provide the students with an integrated view of project management, sensitizing them about the complexities involved in managing projects and equipping them with techniques for effective project management.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to understand:

- Factors that are important in selecting projects.
- Different types of models for selecting projects, why are they useful and what are their limitations?
- Identify and describe the components of the project portfolio process.
- The components of the project maturity model.
- Importance of project risk assessment in project management.
- Different approaches for assessing project risks

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Project Management Principles: Definition of project, project management processes and other key concepts, principles of project management, roles and responsibilities of the project manager, project life cycle, causes of project failures		
UNIT-II		10 Hours
Planning the project: Project planning process, project charter and project plan, work breakdown structure (WBS) techniques, project structuring and organization considerations, change management and conflict resolution issues.		
Estimating Project Costs: Type of costs, Elements of budget, approaches for estimating cost and budget, Factors influencing quality of estimates.		
UNIT-III		11 Hours
Estimating Project Time: Activity sequencing, Estimating time, precedence network diagram, critical path method, program evaluation and review techniques, project scheduling, and basics of scheduling.		
UNIT IV		11 Hours
Project Quality Management: An Overview of PQM processes and their integration with Project Management Plan		
Managing Risks, Project Control and Performance Management: Risk concept and identification, risk assessment, prioritizing risks, risk response planning, Project tracking and control elements, Earned Value Management, factors contributing to successful project control, Measures of project success.		
Text Books

CORPORATE GOVERNANCE	
Course Code: MMS-204 Contact Hours: L-2 T-0 P-0 Course Category: DCC	Credits: 2 Semester: 3

Introduction: In the past two decades, corporate governance has become a central issue globally. With corporations growing larger and larger the need for capital has given rise to new challenges of governing business.

Course Objectives: This course is designed to develop student's understanding of corporate governance and the role of new age leaders in creating socially responsible organizations. The course will help them to study and examine the conceptual, contextual and ethical issues in organizational decision making. It will equip them to understand the subsistence marketplaces and identify opportunities at the Bottom of the Pyramid.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Understand conceptual and theoretical foundations of corporate governance
- Develop an awareness of the practical problems associated with the interaction of the board, CEO and other layers of management, shareholders and various stakeholders of a corporation
- Develop the technical skills required to evaluate the governance of a company from the perspective of an investor (individual or organizational capacity)
- Prepare for leadership positions in organizations such as entrepreneurs, senior managers, future directors and CEOs.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights

BUSINESS INTELLIGENCE	
Course Code: MMS-206 Contact Hours: L- 2 T- 0 P-0 Course Category: DCC	Credits: 2 Semester: 4

Introduction: Over the past few decades there has been a monumental transition regarding collection creation and use of data. While great strides have been made in data management, there is always a desire to extract business value hidden in the piles of bits and bytes. This course focuses on the tools and techniques for the same.

Course Objectives: To expose students to techniques of analyzing hidden patterns in data for effective decision making.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Identify the use of data warehousing and data mining in different business applications)
- Identify the different data warehouse architectures and data warehouse models) Recognize the various data mining techniques.) Know how the data mining is useful in an e-commerce environment.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
2	0	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		14 Hours
Introduction to Data Science: Data Science, Data pre-processing, Introduction to decision support systems, Big-data, Hadoop and data mining, OLAP and Data Mining.		
UNIT-II		14 Hours
Data Mining & Classification: Mining Frequent Patterns, Associations, Correlations, Classification, Prediction, Clustering, Data mining applications in business.		
Text Books		
1.	Tan P., Steinbach M. and Kumar V., (2018), “Introduction to Data Mining”, (2 nd Ed.), Pearson Addison Wesley.	
2.	Warren J., Marz N. (2015), “Big Data: Principles and Best Practices of Scalable Real-Time Data Systems”, (1st Ed.), Dreamtech Press.	
3.	Successful Business Intelligence, Second Edition: Unlock The Value Of BI & Big Data By Cindi Howson.	
4.	David Olson, Yong Shi, “Introduction to Business Data Mining” 1st Edition, McGraw-Hill.	

CORPORATE MERGERS, ACQUISITIONS AND RESTRUCTURING	
Course Code: MMS-210	Credits: 4
Contact Hours: L-3 T-1 P-0	Semester: 4
Course Category: DEC	

Introduction: This course is designed to provide an understanding of the essential elements of Mergers and Acquisitions with the basic methods of valuation along with regulatory framework, pre- and post-merger Valuation, methods of payment and financing options at global level.

Course Objectives: The objective of this course is to develop expertise in identifying inorganic growth strategies through mergers, acquisitions and restructuring of corporate enterprises for enhancing the value.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- To facilitate the understanding of process and economic rationales of corporate Restructuring tools such as Mergers & Acquisitions, particularly in the international domain of operation.
- To enable the deep understanding of techniques of application of M&As.
- To apply the valuation techniques to M&A Assessment and decision making.
- To enable the student to acquire analytical skills in analyzing real-world cases in the need for M&A in a respective international venture.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Introduction to Mergers: Nature of acquisitions and amalgamations. types of merger – motives behind mergers – theories of growth of the firms and organic, inorganic growth strategies – value creation in horizontal, vertical and conglomerate mergers – internal and external change forces contributing to M & A activities A strategic perspective- industry life cycle and product life cycle analysis in M&A decision, strategic approaches to M&A- SWOT analysis, BCG matrix, Porter’s Five forces model.		
UNIT-II		10 Hours
Regulatory Framework: Legal and regulatory framework of M & A – provisions of Companies Act 2013, Indian Income Tax act 1961 – SEBI takeover code, Provisions of Competition Act. Corporate Bankruptcies: Concept of Bankruptcy, Identification and Management thereof.		
UNIT-III		11 Hours
Merger Process: Dynamics of M & A process; identification of targets and process of due diligence, preparation of due diligence report, deal restructuring. Process of merger integration–organizational and human aspects –managerial challenges of M & A, Integration of merged entity; process and problem, proxies and takeover tactics.		
UNIT IV		11 Hours
Corporate restructuring: Different methods of restructuring – joint ventures – sell off and spin off – divestitures – equity carve out – leveraged buyouts (LBO) – management buy outs – master limited partnerships – employee stock ownership plans (ESOP), Going Private. Valuation of M&A: Valuation approaches :discounted cash flow valuation , relative valuation , valuing operating and financial synergy , valuing corporate control; cash offer, share exchange ratio – mergers as a capital budgeting decision.

DERIVATIVES AND RISK MANAGEMENT	
Course Code: MMS-212 Contact Hours: L-3 T- 1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction: The course will equip students with principles and techniques of Derivatives including various strategies of call and put options and its models like BSM and Binomial, and Risk Management through stock market.

Course Objectives: The course aims at imparting skills of managing Risk through options, futures and derivatives.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Understand derivatives in detail such as forward, futures, options, swaps etc.
- Understanding of option pricing models with different strategies.
- Understand the concept of hedging, speculation and arbitrage.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Introduction to Financial Derivatives: Forwards, futures, options, swaps and other derivative instruments. Basics of hedging credit, currency and interest rate risks -Difference between hedging and speculation -Hedge Funds vs Mutual Funds.		
UNIT-II		11 Hours
Fundamentals of Forwards and Futures: Organization and structure, trading mechanism, cost of carry model, Determination of forward and future prices: Pricing of futures and forwards on investment assets, commodities, currencies and interest rate.		
Hedging Strategies using Forwards and Futures: Short hedge and long hedge using futures, cross hedging of portfolio and commodities using futures.		
UNIT-III		10 Hours
Option fundamentals: Building Blocks, calls, puts, and underlying; Basic Option Pricing: European options, American options, forward-spot parity, put call parity, Option Greeks, the binomial option-pricing model. Binomial and Black-Scholes Option Valuation, hedging strategies using Options: Option Positions and Strategies, Construction of option strategies in various market situations and their pay off; Betting on a large price decrease, betting on a small price increase.		
UNIT IV		11 Hours
Risk Management: Objective of Risk management, identifying types of risk, quantifying risk and Hedging techniques, Credit default swaps, Total return swaps, Credit spread options, Collateralized debt obligation, Introduction to VaR.		
Text Books		
1.	Hull J.C., (2018), “Options Futures & Other Derivatives”, (9th Ed.), Pearson Education.	
2.	Bagri B. R., Vohra N. D., (2011), “Futures and Options”, (2nd Ed.), McGraw Hill Education.	
Reference Books

FINANCIAL MODELING AND ANALYSIS	
Course Code: MMS-214 Contact Hours: L-3 T- 1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction: The Managers involved in financial decision making/ planning need financial modeling for their day-to-day decision making. This course will cover important concepts of financial modeling and an insight on how to convert the finance related applications in Excel Spread sheet Model.

Course Objectives: The objective of the course is to acquaint students with the methodology of Econometrics & Financial Modeling and make them capable of applying it to business problems. The emphasis will be on application aspects with theoretical understanding. Focus will also be on building models in different areas of finance including investments, corporate finance and derivatives.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Use Excel in financial modeling
- Interpretation of regression models with cross-sectional financial data
- Understand Asset price volatility models.
- Forecast Volatility through volatility models and develop the interactive model, output screen and report.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Introduction: Modeling practices and principles Use of Excel in financial decision making.		
UNIT-II		10 Hours
Financial Modeling: Model specification; desirable qualities of models; evaluating an econometric model; Random variables, stochastic variables and the stochastic error term; probability distributions (review); estimators, desirable qualities of a good estimator; maximum likelihood estimators (definition).		
UNIT-III		11 Hours
Extensions of the basic linear model and the multiple regression model: The 3 variable model; partial regression and correlation coefficients; assumptions of the classical linear model; Derivation of Ordinary Least Squares Estimators; Properties of LS estimators, OLS AS BLUE; Variances and Standard deviations; Goodness of fit: R=squared and adjusted R-squared; Tests of significance t and F tests; Hypothesis testing involving more than one parameter; Forecasting; Evaluation of Forecasts; Mean Squared error, RMS error.		
UNIT IV		11 Hours
Time Series Analysis: Short Run and Long Run Relationships, Cointegration: Cointegration and common trends, Tests of cointegration: Engle-Granger Two Step Procedure, the Johansen-Juselius Multivariate Test, Error Correction Models: - Estimation and interpretation off an Error Correction Model, Forecasting Using an Error Correction Model.		
Modeling Volatility: Time varying volatility model: ARCH, GARCH, AGARCH models and its extension Forecasting volatility and other Volatility models, Developing the interactive model, output screen and report.		
Text Books

3.	S. T. Ruey, “Analysis of Financial Time Series”, John Wiley	

MANAGEMENT CONTROL SYSTEMS	
Course Code: MMS-216 Contact Hours: L-3 T- 1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction: The paper will enrich the strategic aspects in a company. It will help the students in widely taking the decisions related to management aspects and introducing the concept of control management so that proper utilization of resources can be done with minimum cost and wastages.

Course Objectives: The course aims at covering management control and systems used by managers in planning & monitoring and evaluating the organizations as they adapt to changing environment as also the philosophies and responsibilities

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Understand the concept of performance related returns.
- Understand the methods of measuring the financial performance.
- Understand the concept of transfer pricing, its usage and legal framework attached to transfer pricing.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Management planning and control: operational vs. strategic. Business decisions to improve performance: Measures of performance: EVA and ROI. Evaluation of product and divisional performance.		
UNIT-II		10 Hours
Responsibility Accounting: Revenue, Cost and Investment centers, Methods of evaluation of performance. Authority and Responsibility Structures. Governance and control philosophies		
UNIT-III		11 Hours
Budgetary Control: Flexible and Fixed system. Budgetary Control Methods: Methods of Expenditure Control and Risk Evaluation and Management. Behavioral issues in control. Aligning individual/group objectives with organizational goals/objectives. ABC costing method, Control in Not-for-profit organizations		
UNIT IV		11 Hours
Transfer Pricing: The importance of transfer pricing; what is transfer pricing; different approaches to transfer pricing (arm's length principle, formulary apportionment, safe harbors); the arm's length principle; the legal framework. Transfer pricing methods.		
Text Books		
1.	Mautz R. K., Winjum J. O, "Criteria for management control systems: a research study", The Research Foundation, New York.

STRATEGIC COST MANAGEMENT	
Course Code: MMS-218 Contact Hours: L-3 T- 1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction: The objective of this paper is to know the details of costs and the strategies involved in the costing decisions. It will enable the students to steer the strategies in costing issues and challenges in better manner.

Course Objectives: The course aims to develop skills in analysis, evaluation and synthesis in Strategic cost Management. In the process, it focuses on current developments, issues and practices in the context of managerial decision making. The subject includes discussion of costing systems and activity-based costing, activity management, and implementation issues in modern costing.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to

- Identify the key themes in strategic cost finance.
- Facilitate the understanding on the impact of risk and cost of capital on investment appraisal besides their cumulative impact on the value of a capital project.
- Understand cost quality and total quality management.
- Understand the emerging issues like Profitability Analysis, Product profitability Analysis, Divisional profitability, Budgeting- Traditional and Activity based Management Systems and transfer pricing concepts.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*

CROSS CULTURAL AND INTERNATIONAL HUMAN RESOURCE MANAGEMENT	
Course Code: MMS-220 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction: In a globalized business environment, business organizations are employing workforce from diverse backgrounds and geographical regions. Managing a diverse workforce is indeed challenging for present day HR managers.

Course Objectives: This course provides an understanding of the role of human resource management (HRM) in international contexts. It will help students understand issues, opportunities and challenges pertaining to international HRM, developing competency in dealing with cross cultural situations and the strategic and functional roles of HRM in various international contexts.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Understand the role of social and cultural factors on the Behaviour of individual at work places, influence on managerial styles, business strategies, and other organizational processes
- Develop the right perspective to manage people from diverse settings working in multinational organisations

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights

PERFORMANCE MANAGEMENT	
Course Code: MMS-222 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction: Performance management is an ongoing process between the organization and its employees. The process entails understanding the organization goals and establishing its linkage employee performance through planning work and setting expectations, continually monitoring performance, developing the capacity to perform, ongoing feedback, follow-up and rewarding good performance.

Course Objectives: This course aims to discuss the major aspects of technological change and the kind of human resource management strategies and steps which may equip the organization and its human resources to adequately cope with such changes. It also examines the importance of an effective performance management system in helping organizations define and achieve short- and long-term goals.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Understand the various performance management techniques and employ the most suitable technique as per requirement
- Design a sample performance appraisal form based on understanding of KPIs and KRAs
- Learn how to improve the performance of underperformers through mentoring, coaching and training

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights

RETAIL MANAGEMENT	
Course Code: MMS-230 Contact Hours: L-3 T- 1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction:

Retail Management ensures that a retail organization functions at its maximal capacity, serves its target customers, and aligns its operations. The course provides an overview of retailing, from a marketing and managerial perspective, and examines the characteristics, development, and frontiers of the retail industry from a local and global outlook. The course will equip the students to identify the important features and process of Merchandise Planning, Price Management, and Retail Management Information

Course Objectives: The objective of this course is to familiarize the students with the key dimensions of retail industry in view of the changing retail landscape in India and abroad. This course will enable students to develop decision making skills related to retailing. While the course focuses on the retail industry including retailers of consumer services, the content of the course is useful for students interested in working for companies that interface with retailers such as manufacturers of consumer products or for students with a general management or entrepreneurial interest.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Evaluate current retailing trends and demonstrate an understanding of decisions retailers make to satisfy customer needs in an evolving environment.
- Recognize retail opportunities and evaluate the strategies associated with each type of opportunity.
- Explain how retailers use marketing communications to build brand image and customer loyalty.
- Distinguish and characterize the factors and management tools that retailers consider and use when developing their merchandise mix.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

MARKETING OF SERVICES	
Course Code: MMS-234 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction: Service industries dominate the business landscape. Therefore, service marketing is not only a marketing tool but also a means of competitive advantage for services organisations. Services Marketing studies the differences between the marketing of goods and services and extends the traditional strategic marketing mix to include additional elements appropriate for the distinct features of services. To enable a comprehensive understanding of services marketing, students will examine models and frameworks of services strategies including service product and delivery, managing the organization's physical evidence, employees and customers, and measuring customer satisfaction and service quality. A strong foundation of theory is placed on which practical applications can be addressed.

Course Objectives:

The objective of this course is to focus on problems and strategies specific to the marketing of services. Problems generally experienced in marketing services, such as inability to inventory, balancing of demand and supply, controlling quality, will be addressed. Industry examples will be used to discuss strategies to overcome these challenges. However, concepts will be exemplified using cases, examples, and exercises in service industries such as banking, health care, financial planning, consulting, the professions, and communication as well as manufacturing and high-tech industries (in both industries, services offered to the customer is the differentiating factor).

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Demonstrate understanding of the similarities and differences in service-based and physical product-based marketing activities;
- Identify the major elements needed to improve the marketing of services
- Elucidate the challenges of services marketing, including the elements of the product, price, place, promotion, processes, physical evidence, and people.
- Discuss the influences of the multicultural marketplace, business ethics, and socially responsible marketing on services marketing.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

DIGITAL MARKETING	
Course Code: MMS-236	Credits: 4
Contact Hours: L-3 T-1 P-0	Semester: 4
Course Category: DEC	

Introduction:

In 2010 the marketing landscape evolved significantly over the past decade. Brands and marketers were forced to consider alternative approaches in order to reach and connect with prospects and existing consumers. This course allows participants to show an understanding of how technology has affected the development of marketing and its evolution into a field now referred to as Digital Marketing. The course takes participants through the stages of developing a digital marketing plan for their organization. The students are exposed to web-based marketing tools to incorporate new media into traditional media and marketing planning.

Course Objectives: This course gives a comprehensive knowledge about how the digital medium can be used for marketing by using tools like Web Analytics, Web AdWords, Mobile marketing, and YouTube Marketing. Students would be imparted knowledge about the basics of digital marketing along with the importance of Search Engine Optimization. At the end of this course, the students will understand various channels and activities essential to plan, implement, and manage an effective digital marketing strategy for their businesses.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Demonstrate an understanding of Digital marketing and media concepts.
- Develop a digital marketing plan that will address mutual marketing challenges
- Understand the value of integrated marketing campaigns across SEO, Paid Search, Social, Mobile, Email, Display Media, Marketing Analytics.
- Identify and distinguish Key Performance Indicators tied to any digital marketing program.
- Improve Return on Investment for any digital marketing program by understanding how to reach the online target market and develop basic digital marketing strategies.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

E-GOVERNANCE	
Course Code: MMS-242 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction: This course familiarizes students with different concepts of E-Government and E-Governance, different E-Governance models and infrastructure development, E-government security, and data warehousing and data mining for e-governance.

Course Objectives: To familiarize students with the concept of E-governance, related issues and strategies for effective planning and implementation of e-governance projects, assessment frameworks and key Government initiatives for strengthening e-governance

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to

- Understand the concept of e-government and the associated benefits and drawbacks
- Improve Public Administration
- Improves delivery and efficiency of government services

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		11 Hours
Introduction to E-Governance: Governance System in India, Allocation of Business, E-Governance in India, Evolution of E-governance in India, global scenario of e-governance, Digital India Programme, E-governance mission mode projects with particular reference to agriculture, Institutional framework, E-governance Challenges.		
UNIT-II		10 Hours
Measuring E-governance Performance: Key stakeholders and value from e-governance, Assessment of E-governance, a strategic framework for improving E-governance performance.		
UNIT-III		10 Hours
Driver of E-governance: Concept of changing situation as a driver, significance of shared vision and mission, service accessibility, feedback loop, Key initiatives such as open government, joined-up government, e-Panchayat, Direct Benefit Transfer, e-governance standards, etc.		
UNIT IV		11 Hours
Strategic Planning – An Enabler of E-governance: Analysing suitability of conventional planning approach to E-governance, Refining structures and processes. Strategy Implementation: Competence level of actors, involvement of senior leadership, motivation of staff, Involvement of stakeholders, Effective e-governance through strategic alliances, select case studies

STRATEGIC TELECOMMUNICATIONS MANAGEMENT	
Course Code: MMS-244 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction: Strategic Telecommunications Management Addresses the need for a thorough understanding of the many technical possibilities available in today's and future networks. Special emphasis is placed on the various services provided by networks and telecommunications, as well as the potential market possibilities they provide to the business fabric. The curriculum lays the groundwork for business innovation by focusing on good management and aligning operational strategies with Telecommunications techniques.

Course Objectives: To expose students to policy, economic and business perspectives of Telecommunications Management and related emerging challenges including Telecom Marketing.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to

- Improve Efficiency in Communication
- Boost Customer Relations and Services
- Save Time, Costs and Office Space

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I	10 Hours
<p>Telecom Technology Systems Evolution: Evolutionary aspects of telecom technology starting from telegraphy, telephony, internet, terrestrial and wireless telecom technologies. Convergence aspects of computers and communications and its impact on telecom service provision business. Recent Developments in Telecom technologies. Techno-managerial aspects of telecommunication, role of the telecommunication managers in a dynamic environment. Convergence of voice, video and data. Broadband technologies, planning mobile networks for coverage and capacity.</p>	
UNIT-II	10 Hours
<p>Telecom Policy Perspectives and Related Issues: Opening up of telecom sector/Regulation & Liberalization policy – global and national perspective. Issues of the monopolization and deregulation of the telecom sector, national telecom policies, various industry players/institutions/ organizations like telecom regulatory authority, dispute redressal tribunal etc. Spectrum auction and utilization, Institutional arrangement for monitoring compliance of regulation by telcos (TERM cells). Mergers and acquisitions in telecom, Universal Service Obligation Fund (USOF) for inclusive telecom growth.</p>	
UNIT-III	11 Hours
<p>Economic and Business Perspectives of Telecom Systems: Role of telecommunications in socio-economic development; telecommunication as a facilitating infrastructure for economic development of the country, new technologies and services for international telecommunications; business application of global networks. Regional prospectus on development of Telecom. The business of telecommunication; technical survey of the ways and means that voice, data and video traffic are moved long distances, data network, the telephone system. Telecom service costing, economic evaluation of telecom projects, telecom project financing. Overview of leading telecom equipment suppliers. New business models (managed services, infrastructure sharing, leasing bandwidth, per minute revenue share model with equipment manufacturers).</p>	
UNIT IV	11 Hours
<p>Telecom Marketing: Challenges relating to telecom services marketing, building brand equity for a telecom operating company, Customer retention & customer care, total service quality management, preparing for the new millennium managing change and people development. Churn management. Designing segmented tariff plans on the basis of CDRs. Designing IT system for integrating provisioning, customer care & billing systems</p> <p>Current and Emerging Perspectives Issues in Telecom Management: Current emerging issues and implications for the industry, Indian markets, policy issues, capacity building, problems, challenges of growth. Aspects of strategy making and deployment in telecom service provision business. Performance management system in telecom and implementation of balanced scorecard. Application of telecom technologies in Internet of Things (IOT), Telecom solutions for smart city projects. Green telecom initiatives for energy conservation.</p>

KNOWLEDGE AND INNOVATION MANAGEMENT	
Course Code: MMS-246 Contact Hours: L-3 T- 1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction: Technological advancement is rapidly becoming a source of long-term strategic advantage for businesses all over the world. Building an organisation that can effectively and repeatedly put technical advances to market, is a challenging management challenge. This course focuses on the strategies and procedures that executives use to successfully handle creativity. We will look at four facets of technical creativity this semester: discovering, implementing, exploiting, and renewing progress. Our focus would be on entrepreneurial firms (both new and established), as well as firms that have been competitive and ineffective in their innovation efforts.

Course Objectives: The goal is to establish a foundation of concepts and contribution of Knowledge and Innovation Management. In addition to this, how Knowledge Management impacts the Innovation quotient in an organization.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Apply innovation-related theories in different settings in order to generate new approaches to innovation
- Identify, evaluate and suggest solutions to challenges in large and small organizations relating to innovative performance.
- Practice of knowledge and intellectual capital management. Formulate action plans for knowledge intensive organisations
- Identify some of the key tools and techniques used in knowledge management applications.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights

Contents:

UNIT-I		10 Hours
Introduction to Knowledge and Knowledge Management: Definition, evolution, need, drivers, scope, approaches in organizations, strategies in organizations, components and functions, understanding knowledge, Knowledge creation process, knowledge management techniques, organizational knowledge management architecture and implementation strategies.		
UNIT-II		10 Hours
Learning organization: Definition, five components of learning organization, knowledge sources, and documentation, relevance of learning organizations in 21st century, cases of learning organizations, building the knowledge corporation and implementing knowledge management in organization.		
UNIT-III		11 Hours
Introduction to Innovation: Meaning, Definition, Innovation and Invention, difference in Innovation and Invention, Creative Thinking, Steps from Creativity to Innovation, Types and Sources of Innovation, Process of Innovation, Technology innovation process, Case studies of Creativity and Innovation.		
UNIT IV		11 Hours
Innovation in Organization: Introduction, Innovation in research, Strategies of innovation and Developing new business, Current state of Innovation at global and Indian organizations, factors contributing to Innovation culture, Barriers to innovation, Case studies highlighting the success and inhibiting factors.

E-LEARNING AND KNOWLEDGE MANAGEMENT (Common with Knowledge Management Specialization)	
Course Code: MMS-248 Contact Hours: L- 3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction: This course aims to impart knowledge about how to create, use, share and maintain organizational information effectively with the help of an e-learning system.

Course Objectives: The objective is to give you a solid foundation covering the concepts and techniques of E Learning, Knowledge Creation and Dissemination. Also, to make the students understand how to apply and integrate appropriate components and functions of E Systems in KM domain.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Enhance their decision-making ability.
- Improve problem solving skills.
- Boost technological understanding.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

KM TOOLS AND E-BUSINESSES (Common with Knowledge Management Specialization)	
Course Code: MMS-250 Contact Hours: L- 3 T- 1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction: This course will help students to learn how to share information internally and externally efficiently with the help of several tools and management systems and how to design an effective knowledge management with the help of e-business applications.

Course Objectives: The objective is to give the students a strong foundation covering the concepts of E-Business and Knowledge Management. Also, to make the students understand how to apply and integrate the KM tools and techniques in the E-Business arena.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Make use of several knowledge management tools and software.
- Extract data and analyse them to make decisions.
- Learn how to share the right knowledge with the right person at the right time.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

INTEGRATING KNOWLEDGE MANAGEMENT WITH STRATEGIC INITIATIVES	
Course Code: MMS-252 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction: The management knowledge needs understanding to define and guide strategic processes and infrastructure for managing organizational knowledge to lead businesses with competitive business strategies and initiatives.

Course Objectives: The growing awareness of the crucial role that knowledge can play in gaining competitive advantage has led businesses to confront how to build competitive business strategy around a firm's intellectual resources and capabilities. This course aims at providing an understanding on how to define and guide the strategic processes and infrastructure for managing organizational knowledge.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to understand:

- KM and Strategy
- Macro and Micro Factors and Knowledge Management
- Leadership, Culture and Knowledge Management
- Change and Strategy

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
KM and Strategy: Knowledge Management, Strategy, KM Strategy, Operational Strategy, Linking KM and Strategy, Study of KM as an integral and essential component of an organizational system at both operational and strategic levels.		
UNIT-II		11 Hours
Macro and Micro Factors and Knowledge Management: Factors such as quality, systems thinking, environmental scanning, convergence, and constructive conflict are emphasized as essential contributors in the integration of KM in planning, decision-making, and implementing operational and strategic initiatives.		
UNIT-III		10 Hours
Leadership, Culture and Knowledge Management: Leadership, Culture, Linking KM and Culture, Embedded system elements like leadership, Corporate Culture addressed, Adoption of KM at Strategic, Tactical and Operational level.		
UNIT IV		11 Hours
Change and Strategy: Change, Change Management, Levers of Change Management, Structural and Behavioral Change to gain Organizational Acceptability, Ways to circumvent Roadblocks and Pursue Pathways Needed to Change.

ADVANCED KNOWLEDGE MANAGEMENT CONCEPTS	
Course Code: MMS-254	Credits: 4
Contact Hours: L-3 T-1 P-0	Semester: 4
Course Category: DEC	

Introduction: It cannot be overemphasized that the emergence of information and communication technologies (ICTs) has metamorphosed the way information resources are managed in different heterogeneous environments. These changing trends have seen the shift from traditional practices to contemporary practices centered on ICTs as global information management platforms.

Course Objectives: The emergence of electronic records (e-records) and electronic archiving (e-archiving), knowledge management, electronic library (e-library) systems, and so on, has been largely observed in the developed and developing world alike. This course, therefore, intends to present experiences and conceptual groundings in the emerging information management contexts.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Understand the role of ICT infrastructure for knowledge management
- Understand the role of e-library and e-archiving in knowledge management
- Understand the role of emerging technologies in knowledge management

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*

Contents:

UNIT-I		10 Hours
Introduction to Knowledge Typologies: Define the nature and topology of knowledge and knowledge management within a business context. Identify technologies that are most useful for capturing/acquiring, organizing, distributing, and sharing knowledge within an enterprise.		
UNIT-II		10 Hours
Knowledge Management Strategies and Knowledge Architecture: Explain how to formulate a knowledge management strategy, identify major requirements and issues for designing enterprise knowledge architecture and implementing knowledge management projects.		
UNIT-III		11 Hours
Knowledge Management the Organizational Growth: Review the emerging roles of chief knowledge officers and chief learning officers. Explore the future direction of knowledge management based on the history of knowledge, the demands of global competition, Contemporary development in the area of Knowledge Management.		
UNIT IV		11 Hours
Knowledge Management and Organizational Learning: Analyze the needs of 21st-century organizations, Organizational Change and Organizational Learning, Views of future Organizations, Role of Knowledge Management in future organizations.		
Text Books:		
1.	Gabriel Szulanski; Sticky Knowledge: Barriers to Knowing in the Firm, Sage Publishing

INTELLECTUAL PROPERTY AND KNOWLEDGE CAPITAL	
Course Code: MMS-258 Contact Hours: L- 3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction: IPR is closely related with knowledge management and considered as knowledge capital. It studies the New IPR regime and its linkage with the revolution in New Generic Technologies (NGT), Information and Communication Technology (ICT) and Biotechnology, Knowledge quality, Organizational knowledge creation theories and their application.

Course Objectives: The objective is to prepare students to become familiar with the current theories, practices, tools and techniques in knowledge management organizations. Moreover, students will learn to determine the infrastructure requirements to manage the intellectual capital in organizations.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to:

- Understand concepts and application of knowledge capital in an organization.
- Understand concepts and application of intellectual property in an organization.
- Understand the relationship between knowledge capital and intellectual property.

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Introduction to Intellectual Property: Introduction of IPR, need for intellectual property right, Global view of IPR, IPR in India – Genesis and Development, Cases of IPR, Introduction to Managing Organizational Knowledge, Learning and Intellectual Capital, Principles of International Intellectual and industrial property law.		
UNIT-II		11 Hours
Managing Organizational Knowledge, Learning and Intellectual Capital: The nature of Problem Solving, Knowledge, Knowledge Capital, Intellectual Capital, Human Capital, Relational Capital, Social Capital, Structural Capital, Constituents of Organizational Capital, Expert and Expertise.		
UNIT-III		10 Hours
Advanced Level of Managing Organizational Knowledge: Developing metrics for knowledge, learning and intellectual capital, The New IPR regime and its linkage with the revolution in New Generic Technologies (NGT), Information and Communication Technology (ICT) and Biotechnology, Knowledge quality, Organizational knowledge creation theories and their application.		
UNIT IV		11 Hours
Role of Intellectual Capital in Learning Organizations: Learning Organizations, Best examples of Learning Organizations, Balanced Scorecard, BSC and Intellectual Capital, Intellectual capital and related terminologies in clear terms and understand the role of knowledge management in organizations, Importance of intellectual capital to benefit the competitive advantage in organizations, Role of IPR in Learning Organizations.

SUPPLY CHAIN STRATEGY AND INNOVATION	
Course Code: MMS-262 Contact Hours: L-3 T- 1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction: The logistics and supply chain are evolving and playing a significant role in making businesses competitive with the help of Innovations like Collaborative Advantages, Framework for Strategic Alliances, Core Competence etc.

Course Objectives: To understand the role and objectives of Innovation Supply Chain Management. To appreciate the increasing scope of Supply Chain Management and its future challenges.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to understand:

- Strategic objectives of SCM
- Concept of strategic fit, steps in achieving strategic fit
- Collaborative Advantages, Framework for Strategic Alliances

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Supply Chain Strategy: Strategic objectives of SCM - customer focus, product development, market development, diversification, learning & organizational capability, sustainable competitive advantage through SC		
UNIT-II		10 Hours
Managing SC for Strategic Fit: concept of strategic fit, steps in achieving strategic fit, impact of customer needs, impact of uncertainty, multiple products & customer segments, PLC, globalization & competitive changes over time.		
UNIT-III		11 Hours
Expanding Strategic Scope: Minimize local cost perspective, minimize functional Cost perspective, Maximize Company Profit perspective, Maximize SC Surplus perspective, Agile intercompany inter functional scope		
UNIT IV		11 Hours
Strategic Partnerships & Alliances: Collaborative Advantages, Framework for Strategic Alliances, Core Competence – 3PL, 4PL Outsourcing: Advantages & Disadvantages, Pre-requisites, Implementation Issues Supply Chain Challenges: Mass customization, Globalization, Greening, Ethical SC, Intelligent System, Implications for managers, organizations & policy makers

TRANSPORTATION AND DISTRIBUTION MANAGEMENT	
Course Code: MMS-264 Contact Hours: L-3 T-1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction: The supply chain foundation consists of Transportation and Distribution Management and studies interface with operations, manufacturing, marketing, supply chain, Problems with fragmented logistics, integrating logistics within an organization, integrating logistics,

Course Objectives: To understand the flow of materials in a Supply Chain. To appreciate the role of Transportation and Distribution Management. To understand the essentials of distribution from logistics point of view.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to understand:

- Definitions, distribution in the economy a macro perspective, aim of logistics
- Micro dimensions of logistics
- Materials Management v/s physical distribution
- Service productivity, global service issues, service strategy development,

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Introduction: Definitions, distribution in the economy a macro perspective, aim of logistics, activities of logistics, value added role of logistics.		
UNIT-II		10 Hours
Micro dimensions of logistics: interface with operations, manufacturing, marketing, supply chain, Problems with fragmented logistics, integrating logistics within an organization, integrating logistics along the SC.		
UNIT-III		11 Hours
Materials Management v/s physical distribution: Cost centers, nodes v/s links, logistics channel, cost perspective & level of optimality, short run or static analysis, long run or dynamic analysis. Types of relationships: Competitive relationship, product relationship, spatial relationship, intensity of involvement, logistics outsourcing activities –concept & types of 3PL, 4PL, need for collaborative relationships.		
UNIT IV		11 Hours
Overview of service Operations: service productivity, global service issues, service strategy development, service delivery systems, service location & layout, primary concerns of service response logistics –service capacity, waiting times, distribution channels.

IT APPLICATIONS IN SCM	
Course Code: MMS-266 Contact Hours: L-3 T- 1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction: In modern management, information has become a central feature of management planning and control. Computers and information technology are big support for logistics and supply chain management now and viewed as a key factor that will affect the growth and development of logistics and supply chain management.

Course Objectives: To appreciate Information Technology as a significant business segment of the future. To give an overview of technological aspects of Information Technology. To understand strategic aspects of Information Technology in SCM

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to understand:

- Role of IT in Supply Chain
- IT in Planning and Inventory control
- IT in Supermarket & Stores

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		10 Hours
Introduction: Role of IT in Supply Chain, Trade Advantages of IT in Retail Trade like Cost productivity benefits and Marketing benefits, Competitive advantages of Information technology, Essential Requirements of an Information System for retail.		
UNIT-II		10 Hours
IT in Planning: Inventory control, POS - Point of sale, Sales Analysis, Planning and Forecasting, Collaborative Planning, Forecasting and Replenishment Capturing and transmitting data at POS, advantages, elements of data capture – coding system code Means of data capture, Database marketing, Data Mining, Data Mart.		
UNIT-III		11 Hours
IT in Supermarket & Stores: Introduction to self - service, supermarkets, atomistic retail to regional networks/ chain stores, POS to point of purchase, push action to push strategy, Point of Differentiation, Point of Customer.		
UNIT IV		11 Hours
Retailers in E- Commerce: Kinds of retailers engaged in electronic commerce: virtual retailers, two channel retailers, Multichannel retailers Role of Internet, Benefits of Internet, Monitoring the progress of an internet e-retail business, limitations of the web. E-Applications: Smart cards, E-cash, Multimedia kiosks, Customer specific offers, Electronic body scanners, Electronic shelf front.

OPERATIONS RESEARCH AND STRATEGY	
Course Code: MMS-268 Contact Hours: L-3 T -1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction:

O.R. is an aid for executive in preparing her strategy by providing her with the needed quantitative information's based on the scientific method of analysis.

Course Objectives: To emphasize the key role of operations in bringing about the growth and profitability of organizations. To impart ideas, concepts and principles in operations strategy.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to understand:

- Importance and Linkage with Corporate strategy, Strategies and values, Competing through operations
- Change & Market Strategy
- Operation Strategy Implementation

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		11 Hours
Introduction: Importance and Linkage with Corporate strategy, Strategies and values, Competing through operations. Operation strategy in global economy - Strategic alliances and production sharing, fluctuations of international financial conditions and international companies. Changing nature of world business. Quality, Customer service and cost challenges and social responsibility.		
UNIT-II		10 Hours
Change & Market Strategy: Value as business concept–strategic issues in manufacturing – Value Chain concept Focus, core competence and distinctive capabilities –stake holders & strategy, checking markets, Outcome of Market debate –Linking manufacturing to Markets – strategic integration –why products sell in the markets –Order Winners, Order Qualifiers.		
UNIT-III		10 Hours
Operation Strategy Implementation: Technology strategy Issues in New Product development Time to market –strategic nature of process–Business implication of Process choice Hybrid Process.		
UNIT IV		11 Hours
Change management and Sustainability Procedure: company or plant-based profiles – decisions for product reallocation – downsizing – Capacity decisions Progression & Regression. Evaluating various tradeoffs alternatives Focused manufacturing with product or process focus– Make or Buy– merits /demerits.

MATERIALS AND STORE MANAGEMENT	
Course Code: MMS-270 Contact Hours: L-3 T- 1 P-0 Course Category: DEC	Credits: 4 Semester: 4

Introduction: Materials Management deals with planning, acquiring storage, and facilitating movement of raw materials required for manufacturing a product and ensuring it reaches the customer. This course will ensure the comprehensive understanding of the subject to the students.

Course Objectives: To give an overview of various aspects of Materials Management. To explain the impact of material cost on the organization. To understand the concepts of Store in an organization.

Pre-requisite: None

Course Outcomes: Having successfully completed this course, the student will be able to understand:

- Material Concepts, Inventory concepts.
- The Basic EOQ Model, Production Quantity Model, Computer Solution of EOQ model
- Use of ratios and analysis like FSN

Pedagogy: The teaching-learning of the course would be organized through lectures, tutorials, assignments, projects/ presentations and quizzes with emphasis on case studies. Faculty members strive to make the classes interactive so that students can correlate the theories with practical example.

Evaluation Scheme:

Course Type			Examination		Relative Weights						
L	T	P	TH	PR	CAT	CAP	MTET	MTEP	ETET	ETIP	ETEP*
3	1	0	Yes	--	10	--	30	--	60	--	--

Contents:

UNIT-I		11 Hours
Introduction: Material Concepts, Inventory concepts, Pressures for Low Inventory, Pressures for High Inventory, Role of inventory in Operations, Types of inventory – seasonal, decoupling, cyclic, pipeline, Safety stock. Inventory costs – carrying costs, ordering costs, shortage costs.		
UNIT-II		10 Hours
Review Systems: Continuous Review (Q) systems, Periodic Review (P) systems, ABC Classification system, Issues in the P and Q systems of inventory control.		
UNIT-III		10 Hours
Write Models: The Basic EOQ Model, Production Quantity Model, Computer Solution of EOQ model with MS Excel, Quantity Discounts, Computer Solution of Quantity Discounts model with MS Excel, Reorder Point, Safety Stocks.		
UNIT IV		11 Hours
Use of ratios and analysis like FSN: Fast slow Nonmoving, HML-High Medium, Low, XYZ. Materials Management in JIT Environment
